TEAK WOOD
(Domino, Mariposa, Tru Pure, Serene/Synthesis, Arches/Les Arcs, Tweed, Welcome Weave, Welcome Teak)
MATERIAL FACTS: Teak is a hardwood traditionally found in South East Asia. It is a naturally durable wood. Our commitment is to use only sustainably managed wood in our furniture. See more on the source of our wood at [www.unopiuhd.com](#). Harvesting and drying processes take greatly in the outdoor bulk market. Teak is a naturally durable wood when it is properly maintained. It has a naturally beautiful grain and is perfect for outdoor use. It is a practical choice for outdoor furniture.

F L O W

JOHN REEVES

THE FLOW COLLECTION, made of 100% recycled aluminum and FSC certified teak wood is a perfect example of the philosophy of “responsible design”. Its graceful lines reminiscent of smooth river stones, and a durable zinc plate patina finish, this line is ideal for indoors or out.

JOHN REEVES, winner of the Elle Decoration Future Classic Award, is a designer whose passion lies in working locally and regionally on an interactive level where design is not just communicated but felt. In doing so, John Reeves has honed a particular skill base; travelling, living and adapting to the various cultures and peoples he meets when working with the craftspeople of our planet. These travels not only establish a better understanding of global resources and the relevance a design can have to our global environment.

TRU PURE SOFA GROUPINGS

The Tru Pure Sofa collection is a modular lounge system that can be arranged in various combinations. Here are a few suggested arrangements:

HENRY HALL

THE TRU PURE COLLECTION is made of plantation teak. The designs are influenced by the modernist period of furniture. The straight lines create a simple and elegant look.

HENRY HALL started his career in furniture in 1989. He has designed parts of the Tru Pure and Mariposa collections, and has also collaborated with other designers. Always at the edge of design, Henry Hall has become a premium name in indoor and outdoor furniture.

THE TRU PURE COLLECTION CAN BE 100% CUSTOMIZED FOR ANY PROJECT. THIS INCLUDES HEIGHT, WIDTH AND DEPTH.

M A R I P O S A

TED BOERNER

THE MARIPOSA COLLECTION is made from Forestry Stewardship Council certified plantation teak. The design is reminiscent of early Danish modern furniture.

TED BOERNER began his own design firm, Ted Boerner Inc., in 1988 and over the years his custom interior furnishings have garnered great respect from clients and designers around the world. His furniture is available nationwide through Ted Boerner and representative showrooms. His Mariposa collection for Henry Hall began when Hall approached him with an idea: to translate Boerner's elegant Nest Sofa for outdoor use. A nine piece collection grew from the idea, with additional pieces in the works. Boerner is based in San Francisco.

MARCO ACERBIS

The DOMINO COLLECTION mixes up the new trends of the design. By expertly alternating fabrics and shapes the creative Italian designer underlines, one more time, how fine is the border between indoor and outdoor. Elegance and beauty. Freshness and grace. Domino is the real consecration of craftsmanship that becomes art with an unparalleled care of the details. It is clear not only by considering the particular use of wood but also the approach with aluminum and fabrics that are all in harmony with a completely different product if we compare it with the classic disposable outdoor.

MARCO ACERBIS interest for contemporary issues takes him to be directly involved in sustainable architecture with the design and construction management of Polins which is certified CasaClima Class A+, the best building standard.

MARCO PAOLELLI AND SANDRO MENEGHELLO

Marco Paoletti and Sandro Meneghello founded Meneghello Paoletti Associati in Milan in 2007. Since then, the studio has grown and now counts a team of collaborators in addition to the founders, as well as a series of project development and communications partners. They have received numerous international recognitions, among which are ten Red Dot Design Awards, including one "Best of the Best", seven Design Plus Awards, three Good Design Awards, five ADI Design Index Awards, three special mentions for the German Design Awards and five mentions at Young&Design Award.

C U S T O M I Z E D

Henry Hall Designs is proud to offer complete customization services in Teak. From cushions to dining tables and sofas, Henry Hall Designs can create your Teak vision.

C O L L E C T I O N S

We can modify our original Mariposa, Tru Pure and Chelsea Eccentrics furniture designs to meet your specifications or we can help you make a completely new creation.

Swing created by Lawrence Dziurdzik, Landscape Architect

ABOUT THE COMPANY

Henry Hall Designs is based in San Francisco, California, and since its inception, has offered clients high quality outdoor furniture in a range of innovative designs. Along with our leading designer showroom representatives nationwide, we strive to make every purchase as seamless as possible for our clients. As a privately-owned company, run by founder Henry Hall, we personally stand behind our products and are committed to providing the utmost in customer service and product excellence.

MATERIALS & MAINTENANCE

Please see below for summary of furniture care and maintenance information. We recommend that you review our complete care and maintenance brochures prior to placing your order. Please download our “Care of Furniture” PDF brochures on www.henryhalldesigns.com or call our office 800.767.7738 or 650.239.9530 for copies to be sent to you.

TEAK WOOD (DOMINO, MARIPOSA, TRU PURE, ARCHES/LES ARCS, SERENE/SYNTHESIS, FLOW, WELCOME TEAK, WELCOME WEAVE, & TWEED COLLECTIONS)

MATERIAL FACTS: Teak is a hardwood traditionally found in South East Asia, although tree plantations are now located in different tropical climates worldwide. Our commitment to the environment ensures that only sustainably managed wood is used in our furniture. See more on the source of our wood in our PDF brochure. Harvesting and drying processes vary greatly in the outdoor teak market – we use only the highest quality. Our teak is properly matured wood where oil content is at its peak and kiln dried to strengthen the wood for long-term use.

OUTDOOR USE: Teak is ideal for outdoor use – it has a naturally high oil content (to resist cracking or splintering) and although a hardwood, is not too heavy for practical use. Left unfinished (standard for all Henry Hall orders), sunlight and air will oxidize the top layer of the wood to turn to a silver-grey patina. To protect the original “honey color” of teakwood outdoors, a teak sealer must be applied, and re-applied every 6 to 12 months, depending on weather conditions – see more in our “Sealing/Finishing Teakwood” PDF brochure. In the outdoors, all wood will undergo a “breathing” process, which will expand the wood grain, in some areas causing fine cracks or rough patches. This process will smooth out over time and in no way affects the durability of the furniture.

REGULAR CARE & CLEANING: When furniture first arrives, dust with damp cloth to remove “teak dust”. It is advised for the first three months that cushions be removed as often as possible, as the natural oils reach the surface layer of the wood and can stain cushions. Every 6 to 12 months, scrub furniture with a soft bristle brush, using mild soap (such as natural liquid dish detergent) and rinse with fresh water, to prevent build up of mildew feeding on the wood’s natural oils. Teak can be “watered” often using fresh water to help weathering process develop more evenly. See PDF brochure for more information on removing deep stains or to fully restore original color of wood. If furniture is covered, use only an appropriate “breathable” cover for teak wood. Henry Hall Designs sells covers for our furniture – please inquire.

RESIDENTIAL WARRANTY: We warrant our teak wood sold to the original owner to be free from defects in construction for 3 years of normal residential use. Fine “checks” from the breathing process is not considered a defect; it is a natural process of the wood. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

REGULAR CARE & CLEANING: The table top is resistant to most stains, but it is advised to clean the top immediately after spills. To clean, simply wash with a mild natural soap (such as liquid dish detergent) and fresh water, using a cloth. Wipe to dry. As usual, test any product you use in a small area first. Also be sure to maintain regular cleaning on the stainless steel frame (see “Stainless Steel” section).

POWDER COATED ALUMINIUM (DOMINO, WELCOME WEAVE & TEAK COLLECTIONS)

MATERIAL FACTS: All the items have a powder coating aluminium frame.

REGULAR CARE & CLEANING: To keep the product in good condition we recommend regular cleaning, particularly frequent in places characterized by high humidity and marine climate. We recommend cleaning the surfaces with a soft cloth using water or neutral detergents. Prolonged and uninterrupted exposures to intense UV radiation or at very low temperatures can affect the initial characteristics of the colored polyester coating. We recommend cleaning and storing products in sheltered areas during long periods of non-use and winter.

RESIDENTIAL WARRANTY: We warrant the frames used for Domino sold to the original owner to be free from defects in material and construction for 2 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

WAPROLACE® (SERENE/SYNTHESIS COLLECTIONS)

MATERIAL FACTS: WaProLace® is a high-quality synthetic and weatherproof fiber hand-woven on Teak frame. Its name comes from the combination of the words “waterproof” and “lace”. Tested in qualified laboratories, three years of constant exposure to atmospheric agents and UV rays, without any colour alteration. Resistant to any chloride solution, like salted or chlorinated water, and ingredients most common in suntan creams and oils.

OUTDOOR USE: Resistant to temperatures from -70°C to + 80°C. Entirely made of polyethylene, it is 100% recyclable and, in case of combustion, does not produce toxic substances.

REGULAR CARE & CLEANING: Use natural soaps or detergents

RESIDENTIAL WARRANTY: We warrant the WaProLace® based products in the Collections sold to the original owner to be free from defects in material and construction for 3 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

TEMPOTEST (ARCHES/LES ARCS COLLECTION)

MATERIAL FACTS: Tempotest is specifically designed for outdoor use. It is a mold resistant, soil resistant, oil and water-repellent with Teflon finishing material on an aluminum frame. Composed of 100% solution dyed outdoor acrylic fiber

REGULAR CARE & CLEANING: Use natural soaps or detergents and a sponge. Rinse with fresh water. Do not clean using any type of abrasive agent or scouring pad.

RESIDENTIAL WARRANTY: We warrant the Arches Tempotest products sold to the original owner to be free from defects in material and construction for 2 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

OLEFIN WEAVE (WELCOME WEAVE COLLECTION)

The Welcome collection is produced with handwoven 100% polyolefin rope in a light gray colour. The polypropylene yarn is suitable for outdoor use. Not only is it extremely soft, but also resistant to sunlight, fungi and bacteria. The yarn, is produced with non-toxic and hypoallergenic materials. It resists to sunlight, salt, chlorine, acids, sunscreens, sweat and stains and has a long outdoor life. Washable at 104°, does not fade and does not stretch. It is 100% RECYCLABLE and energy consumption for the production is less than any other synthetic fiber, from which a considerable environmental advantage derives. The Olefin Weave certified is OEKO - TEX Stand 100.

FABRIC (DOMINO COLLECTION)

It is recommended to clean with a neutral product and a non-abrasive cloth. Cushions have removable covers, are easy to wash and are weather resistant. They contain quick dry foam padding. The fabric is coated with a waterproof treatment and is resistant to UV rays. Fire retardant certification BS EV 1021-1-BS EN1021-2. You can safely launder both fabric in a washing machine. Initial water temperature should not exceed 40°C. Do not dry clean. Do not use electrical dryer and do not iron.

ZINC PLATED ALUMINIUM (FLOW COLLECTION)

MATERIAL FACTS: The frames used in the Flow collection are made of solid sand cast aluminum. The frames are then coated with a zinc plating. The zinc plating results in a beautiful patina finish, and also adds an extra layer of protection against extreme conditions. The zinc plate patina will darken slightly over time.

OUTDOOR USE: The cast aluminum is the same high quality used in Honda engines, and can take any and all of the elements. Because the frames are aluminum, they will not rust. The hardware is steel and has been finished in a black protective powdercoat. These parts are in very discreet areas, and will retain strength even if some discoloration occurs.

REGULAR CARE & CLEANING: To clean, simply wash with natural-based soap and a sponge or soft brush. Rinse with fresh water. We recommend that furniture be cleaned at least on a yearly basis. Do not clean using any type of abrasive agent or scouring pad, which will wear through the zinc plate patina.

RESIDENTIAL WARRANTY: We warrant the frames used for Flow sold to the original owner to be free from defects in material and construction for 2 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

STAINLESS STEEL FRAMES (TWEED COLLECTION)

MATERIAL FACTS: Henry Hall Designs uses Electropolished AISI 304L Stainless Steel in the Tweed collection.

OUTDOOR USE: Stainless steel is a great choice for those looking for durable and stylish furniture that holds up to frequent cleanings. Our metal frames are designed for outdoor use and are treated with a protective layer to provide a high level of resistance to rust. All frames are exclusively offered in “electropolished” finish - a treatment which adds further weather resistant qualities to the steel and a simultaneous smoothing and brightening of the metal surface. However, many people are surprised to learn that all stainless steel can be “stained” in certain environments! If you have any questions about the specifics of your environment, please contact our office and we would be happy to assist in your selection. In general, we highlight three areas of use and care: **(1) standard use; (2) volatile environments use; or (3) coastal waterfront use.**

(1) STANDARD CARE & CLEANING: Furniture that is used inland with little or no direct exposure to salt water or chlorinated water. A **monthly** cleaning is required to remove natural deposits (such as salt or dirt), which can damage the frame and lead to deterioration. Using fresh water only, simply spray the frames down thoroughly, at a high hose pressure. Dry with a cloth to avoid water spots. Residential warranty applies to this environment.

(2) VOLATILE ENVIRONMENTS CARE & CLEANING: Furniture that is used in (A) windy coastal areas (but not directly on the coast) with blowing sand and salt water particles in the air or; (B) exposed directly to chlorinated water (i.e. regularly splashed from a pool or enclosed heated pools where chlorine can hang in the air.) A regular **weekly** cleaning as described above is required to maintain ideal frame condition. Residential warranty applies to this environment.

(3) COASTAL WATERFRONT CARE & CLEANING: Furniture that is used directly on the coast. Special consideration should be used when selecting stainless steel – regular cleanings cannot be overlooked. In these environments a **weekly** cleaning is required (as described above) and it is advisable to often use a sponge and mild soap (such as natural liquid dish detergent) to more thoroughly clean off any deposits. We do not offer a residential warranty against rust for frames used in this environment. For deeper cleaning, please refer to our full PDF brochure for details. Never use industrial pressure washers, abrasive products, or cleaners with bleach or chlorine when cleaning any type of stainless steel.

RESIDENTIAL WARRANTY: We warrant our electropolished stainless steel sold to the original owner to be free from defects in construction and materials for 2 years of normal residential use, when not used directly on the coast and when regular cleaning is being maintained. If the steel frame is not electropolished, this warranty does not apply. These warranties do not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

CUSHIONS

Henry Hall Designs custom makes cushions to perfectly fit each item in our collection. Unless otherwise specified in writing, cushions will be manufactured following the standard outlines, as stated next to the cushion description for each item in this price list. Cushions are fabricated in Customer's Own Material (COM) A 50% deposit is required on the total order to initiate cushion manufacturing. We cannot accept returns or cancellations on COM cushions. COM yardage requirements are estimates based on 54" wide, solid color fabric. Please double check on fabric yardage if using a pattern or stripe fabric. Note: **We do not accept awning weight fabric for cushion construction and we maintain the right to refuse any fabric for cushion construction or charge an upcharge to work with unusual fabrics.** If in doubt of usability, please send a sample in advance for review. Please ship all COM yardage to: Henry Hall Designs, 833 MAHLER STREET SUITE 2, BURLINGAME, CA 94010– Tel: 650.239.9530. Henry Hall Designs' order number (i.e. "040513C") must be marked on the packing slip along with any side mark or tag references to insure accurate and timely fabrication.

CUSHION FILL FACTS: Henry Hall cushions are filled with a standard, medium density, hypo-allergenic polyurethane foam. A Dacron® wrap is then covered around the foam interior. Our cushions are meant to be taken indoors or covered during wet weather. If you live in an area of unpredictably rainy weather, or simply do not want to regularly store cushions when not in use, you can specify Flow-Through foam for your cushions. Additional material specifications on Flow-Through foam can be provided upon request. However, please note that even cushions constructed of Flow-Through foam will have a longer lifespan if they are stored indoors when possible. Please note that no foam, not even Flow-Through foam, is completely mildew resistant. If furniture is covered, use only an appropriate "breathable" cover. Note: protective covers are available for purchase. Please Inquire.

REGULAR CARE & CLEANING: When cushions first arrive, make sure to wipe down furniture before putting cushions on. We recommend covering cushions or taking them indoors when not in use, and certainly during wet weather. This is especially true during initial weathering of new teak furniture when oils will leach out of the wood in damp conditions. As such, it is advised to keep cushions off of teak furniture when not in use especially during the first three months. To prolong the new look of cushions, we recommended that you regularly (once every 1-2 months) brush off dirt to prevent it from settling deep in the fabric, as mildew may grow on dirt and other deposits on the fabric. Depending on what kind of fabric that you use, consult with the fabric manufacturer to find out what they recommend for general cleaning, but in most cases, simply scrub off dirt using a soft bristle brush with fresh water mixed a small amount of natural soap. Do not soak cushion thoroughly, just enough to get the surface dirt off. If cushion does get soaked thoroughly, due to cleaning or rainy weather, unzip the cover and dry thoroughly in an open air environment. Remove foam insert for more efficient drying. Drying time may require several days, depending on wetness of cushion, environmental factors, and the type of foam selected for your cushions. Large sofa pieces, such as Mariposa and Pure Sofa are prone to taking a long time to dry out because of the size of the cushion. The best way to avoid a long drying out time is to keep cushions in a dry storage area.

RESIDENTIAL WARRANTY: We warrant our cushion construction and fill sold to the original owner to be free from defects in material and construction for 1 year of normal residential use. Defects include: faulty stitching, or complete loss of foam shape. This warranty does not apply to: mildew growth, or other damage resulting from improper maintenance, misuse, or normal wear and tear, including teak oil stains. Henry Hall Designs is not responsible for replacing cushions that get wet when left out in the rain. This warranty applies to our seat and back cushions only; we do not offer a warranty on our throw pillows.

SALES TERMS & SHIPPING

PRICING & LEAD TIMES

Prices are F.O.B. San Francisco, Oregon and Pennsylvania. Prices are listed in US dollars and are subject to change without notice. Net pricing is available only to qualified members of the trade. We endeavor to keep items in stock as much as possible, in order to quickly ship all orders. Stock availability and / or production lead times change daily for each product – please contact a Henry Hall Designs representative for up-to-date lead times before placing an order. Verbal or written stock checks, quotes or freight quotes do not constitute a “hold” on said items. Items are only held by a specified written hold confirmation issued by Henry Hall Designs valid for (5) business days or by a 50% deposit made by the client.

GENERAL SALES TERMS & WARRANTY POLICIES

A deposit of 50% of the total balance due is required to initiate any order (which includes cushion manufacturing, beginning production on special order items, etc.) If a deposit is not received within 2 weeks of the PO being submitted, items may be forfeited to paying clients and lead times may be affected. If an order is cancelled after the deposit is received, please note the deposit is non-refundable. Returns are only accepted via arrangement with Henry Hall Designs and are subject to a 25% restocking fee. Full balance is due prior to items being shipped from our warehouse. Goods remain the property of Henry Hall Designs until paid for in full.

Warranties vary from product to product - please consult details for each material. In all cases, warranties apply only to the original owner during normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear. Contract / commercial warranties are issued upon request and above said warranties do not apply to contract / commercial projects. Warranties are valid only from the receipt date of the original order.

SHIPPING

All Henry Hall Designs furniture ships fully assembled. We contact a variety of freight companies to bid on each individual order, for the best and most cost effective method to ship the goods. When necessary, we will crate and ship items for quicker delivery at an additional cost. If desired, clients may arrange their own pickup and delivery by requesting a “will call” option. This option will result in a handling charge which will depend upon the number of pieces. Orders left unshipped after 30 days will incur storage fees of 5% of invoice value per month. An estimated ship date is stated on each order, but an actual ship date can only be confirmed within a few days of shipment. If circumstances beyond our control will significantly change the estimated ship date, Henry Hall Designs will inform the client of the situation as soon as it is possible. Ship dates are also dependent on receipt of the full balance due, availability of transport companies to pick up the order, completion date of furniture/cushions, receipt date of COM, and accurate shipping information. Any delay in the estimated delivery date shall not constitute a right to refuse the goods. All shipments are insured and shipped at the client’s risk. Client must inspect goods when they arrive. In the case of damage, document in detail all damage on the packing slip – both driver and client must sign off the packing slip – and the client should keep one copy. Photographs may also be required. Henry Hall Designs must be informed of any damage within 3 business days in order to file a claim. Provided with documentation, we will be happy to handle any transportation damage claim for our clients for shipping which was originally arranged by our office. Once your furniture first arrives, we recommend before first use that you first brush off any wood particles or dust using a duster or a damp cloth. Keep cushions off teak furniture when not in use for first three months for preventative care. Please refer to our complete “care of furniture” section online for further reference.
