2020 COLLECTION

Tectona, following the path of most excellence

This year, we are proud to present our redesigned and revitalized catalogue.

The new format highlights the breadth and richness of our creations.

The collections within these pages affirm our commitment to excellence, reflected in the earliest models that have achieved classic status right up to the latest additions to the catalogue, and the unique Tectona style:

contemporary classic.

Lavish photography showcases our furniture in various settings where they form the backdrop to people's outdoor lifestyles: urban patios, rural gardens, by the sea or poolside, in renowned hotels and restaurants, in parks and gardens forming our common heritage, in prestigious museums...

New for 2020 is the **Grande Écurie-Versailles** bench designed in collaboration with **Château de Versailles**, our latest partner in a roll call that has included **Musée Rodin, Château de Chambord** and **Musée National Picasso-Paris**.

As you peruse the pages, we hope to convey to you the **excellence of the craftsmanship and the attention to detail** that goes into our furniture.

The main materials we work with –teak, woven resin and aluminium– guarantee the longevity of our furniture. Good looks aside, practical aspects of our furniture –easy to use and easy to care for– are also highlighted to guide our customers in their decisions.

We hope you enjoy exploring our collections!

Enduring style

Choosing outdoor furniture by Tectona reflects a certain taste for aesthetics that transcend their period and are always in visual harmony with their surroundings.

«Contemporary classic»

The strength of our design forged the brand's signature style, to the extent that it rapidly achieved «classic» status in the world of outdoor furniture, which at the time was limited to parks and gardens.

With discreet but decisive changes, our design has evolved in parallel with the evolution of outdoor living, which expanded to new territory such as swimming pools and urban patios.

New materials such as aluminium, woven resin and outdoor fabrics—all of which have been worked with the same rigour as teak—confer comfort and elegance, thereby reaffirming our unique style: «contemporary classic».

The creative spirit

Intertwined with the history of design

In 1977, a newly created French brand, Tectona, made a striking first impression in the outdoor furniture sector with models that drew inspiration from country life across the Channel and from the Arts and Crafts movement that emerged in the late 19th century in Great Britain.

The now-iconic image of a man immersed in reading while sitting on a Circle Bench encircling an oak tree and who is lifted into the air as the tree grows encapsulates our philosophy: inspired furniture, bringing together traditional craftsmanship and functional design adapted to life outdoors, and built to last.

French creativity & spirit

The 1990s heralded our arrival in contemporary design: in 1992, Andrée Putman conceived with Tectona the famous «CAPC» bench for the Contemporary Art Museum of Bordeaux. The momentum has not stopped and since the 2000s, we have collaborated with several young designers including Ronan and Erwan Bouroullec, Pierre Charpin, Inga Sempé, Barber & Osgerby, Christophe Delcourt and others... All of whom have subsequently made their mark on the international design scene.

«Our philosophy: inspired furniture combining traditional craftsmanship with functional design that thrives in all weather conditions»

Prestigious public sites

«Cultured» furniture

Tectona's creations are intertwined with the history of the decorative arts and at the same time are adapted to contemporary life. Every piece of furniture by the brand is the product of traditional craftsmanship and technological prowess executed to the highest standards. The qualities of durability and robustness in combination with the «contemporary classic» aesthetic have earned the furniture a place in several highly visible public spaces. Thus, the Glenwood bench delights visitors at the sculpture gardens of Musée Rodin and aficionados of jardins à la française at the Château de Chambord. While the Muse bench provides comfortable seating from where visitors to the Musée National Picasso-Paris can contemplate masterpieces.

French elegance for the most beautiful hotels

The reputation of Tectona furniture has grown well beyond its national borders and today the pieces can be found in some of the most beautiful hotels around the world. Tectona furniture embodies a certain taste for French luxury and has a rightful place among some of the most magnificent architectural gems today operating as hotels. In Paris, the blue-grey 1800 collection adorns the interior garden and the patio of the renowned Jardins du Faubourg; likewise in Split, Croatia, where it is accompanied by the woven resin furniture of the Shanghai collection in Hôtel Park Split. In Asia, the Grand Hyatt Hong Kong chose the natural option with exclusively teak furniture: Arlington tables, Barton seating and Camarat sun loungers.

Tectona grandis

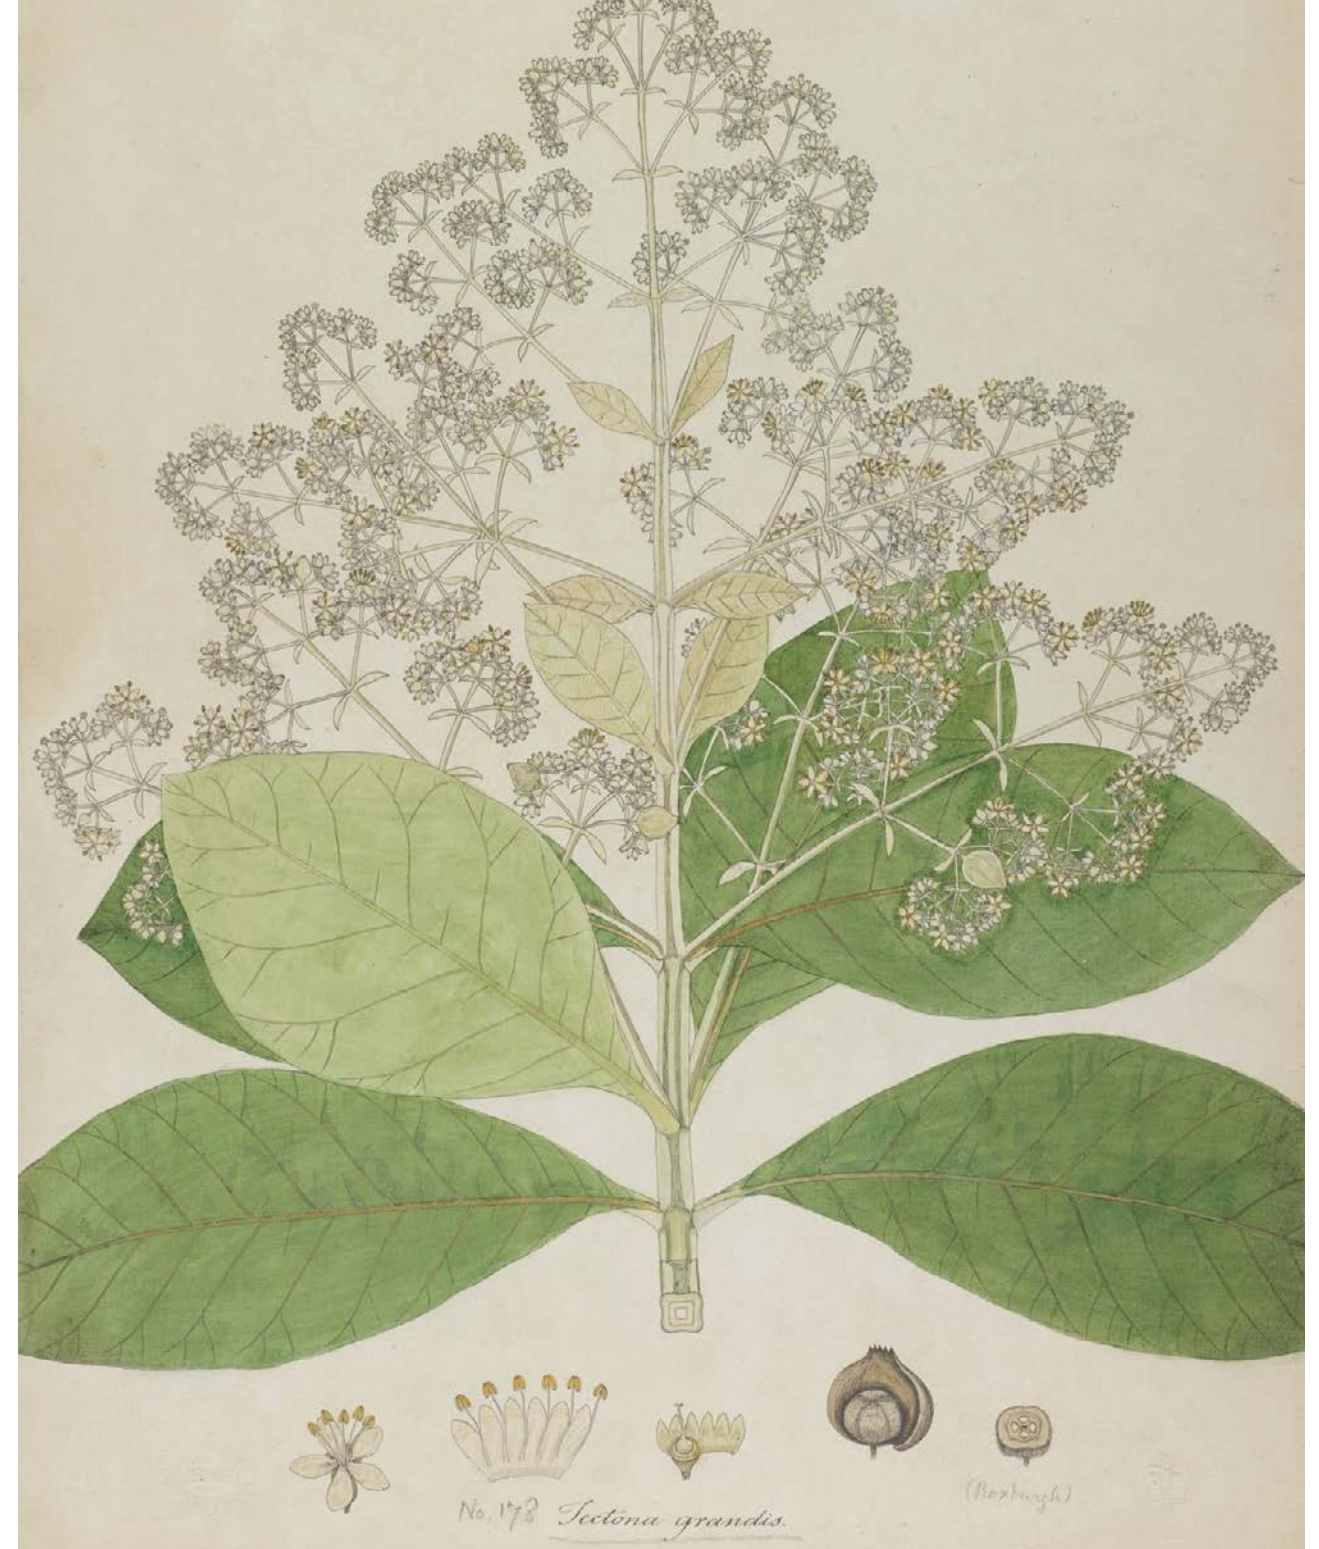

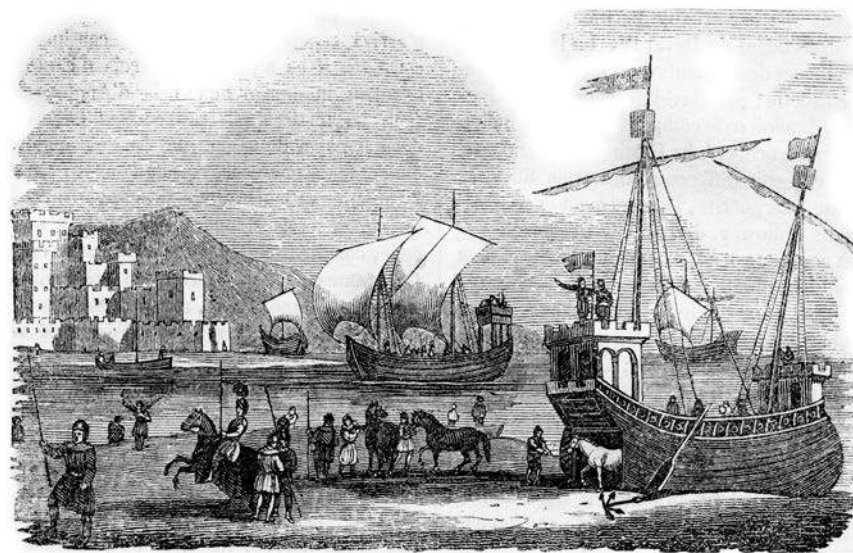

Across oceans to parks and English gardens

The characteristics of teak (*Tectona grandis*) have been known in tropical Asia for over 2000 years. Its density, the ease with which it can be worked but also its resistance made it an obvious choice for architecture, particularly palaces and temples, but also boatbuilding, especially because it produces an oily substance that prevents the formation of rust on nails and other metallic objects. In the middle of the 18th century, the British navy was building teak vessels at its shipbuilding yards in Bombay in India. A century later, at the end of their sea life, these vessels were dismantled and the teak reused, notably to make outdoor furniture including benches intended for parks and public gardens.

From nature to controlled plantations

Teak is native to tropical rain forests, where it thrives on slopes in humus-rich soil, and can reach a height of 18 metres in 15 years. It is a deciduous tree, shedding its leaves in the dry season. When cut, its wood produces a pronounced and pleasant aroma that persists for tens of years. Teak has been extensively acclimated in Asia, notably in Thailand and Indonesia where it is grown in government-run plantations.

Teak, a tree anchored to History

© Kew Royal Botanic Gardens

The name of the genus Tectona is derived from the Portuguese word Teca, which itself is derived from the Greek word Tekton meaning «carpenter»

Rodin Museum, Paris

Tectona, noble teak

Teak is a truly remarkable wood: it does not rot; it is resistant to the vagaries of weather, from droughts to humidity; it can withstand temperature variations and prolonged exposure to sunshine or sea spray. It symbolises all the qualities sought by Tectona for its furniture.

A wood unlike others

We seek out the best logs, which are then worked with the utmost care at every stage, from the cutting of the trunks then the slats to the several assemblies using mortise-and-tenon joints in accordance with traditional techniques. The nobility of this wood lends itself to beautiful objects that stand the test of time, unwavering, indifferent to adverse weather conditions, in the manner of a ship's deck defying storms. Teak, a wood unlike others, deserves only the best care and technical expertise. And these are provided by a recipient of the prestigious Meilleur Ouvrier de France award.

«The nobility of this wood lends itself to objects of art that transcend the ephemeral...»

Bringing forth lightness

We are in a state of perpetual renewal, imagining tomorrow's classics. Materials such as woven resin and aluminium are worked with the same rigour as teak to provide ease of use and at the same time to preserve the comfort and elegance that are deeply ingrained in the Tectona culture.

Woven resin

A haute couture mesh ideal for the outdoors

At the start of the 2000s, Tectona incorporated woven resin into its furniture collections. This 100% recyclable material, made from polyethylene, is remarkably light and malleable; resulting furniture is easy to move and has fluid contours.

The ideal combination: woven resin and aluminium

The resin is manually woven onto an aluminium structure, which makes the weave particularly resistant. One of the many qualities of woven resin is that it needs minimal care: as it is a smooth, non-porous material, dirt does not become encrusted.

Shanghai by Christophe Delcourt and Pebble by brothers Ronan and Erwan Bouroullec are two of our emblematic collections made from a woven mesh.

Aluminium

Your ally for life outdoors

Over the last decade or so, the growing desire for outdoor living has generated a new set of requirements, which read like a data sheet for aluminium! Aluminium is a durable material, resistant to all types of corrosion and completely impermeable due to the aluminium oxide layer that naturally forms on its surface. It is light, producing furniture that can be moved with minimal effort. Powder-coating employs the electrostatic effect to coat the aluminium with a powdered paint, which subsequently polymerises in an oven at 200°. This process not only produces a durable colour but reinforces shock-resistance.

Light and coloured aluminium chez Tectona

Aluminium made its entry into Tectona at the turn of the present century, as the frame structure for woven resin furniture. A few years later, in 2006, it stepped into the limelight with the launch of the 1800 collection in blue-grey aluminium, later also in black. In 2007, the designer Pierre Charpin used aluminium in combination with teak for the Tennis collection.

«...forms that manifest the agreement
between the constraints of the material
and the aspirations of the spirit are useful
(and beautiful)»

André Hermant, *Formes utiles*, 1959

Studio Tectona

Studio Tectona, writing the future

It is our firm belief that design is the catalyst for renewing the forms of garden furniture while guided by practicality and comfort requirements. The launch of Studio Tectona in 2017 gave young talents the opportunity to be launched alongside experienced designers. This dialogue reinforces the brand's vitality and dynamism while giving designers access to our expertise, notably the technical skills of a recipient of the prestigious Meilleur Ouvrier de France award.

Our goal? To stimulate creativity!

The fifteen designers below include experienced professionals and relative newcomers: they are presented via their exclusive creations for Tectona made between 2003 and 2019. The diversity of the furniture presented is a testimony to how tastes for outdoor living have evolved; now it is sought out even in cities, in patios or balconies and even in private gardens. With this evolution, designers were faced with new requirements for practicality such as ease in moving, stacking or folding chairs, armchairs and tables. Aluminium, alone or in combination with teak or woven resin, fulfils the new requirements. Teak, worked into airy slats or light structural frames, also received a contemporary make-over.

1800

The elegance of the Directory style

The 1800 collection is inspired by neoclassic French furniture that was in vogue during the period of the Directory (1795-1799). Rigorous contours are tempered by the curvature of the backrest and the nub motif at the intersections of the various aluminium elements.

The blue-grey colour, created by Tectona specifically for this collection, imparts a soft and soothing gleam.

The 1800 collection is available in

- Tectona blue-grey
- Matt black

A collection...

The inspiration for this collection was the wrought iron bench owned by Madeleine Castaing (1894-1992), who was a central figure in the Montparnasse scene in the interwar period. Madeleine Castaing was a patron of the painters Amadeo Modigliani and Chaïm Soutine and exercised her talents as a decorator for several leading figures of the day, including Jean Cocteau and Francine Weisweiler, and in doing so propagated the «Castaing» style. Today, 1800 is a very complete collection of furniture and accessories.

..laden with history

Madeleine Castaing bench 160 cm
Available in blue-grey or matt black

Strokes reminiscent...

The colour black seemed predestined to blend harmoniously into landscapes. It works perfectly with the colours of nature – the blue of the sky or sea, the green of leaves – but also with the mineral colours of cities... The black serves to highlight the contours, akin to a stroke of India ink. This famous collection pays tribute to Madeleine Castaing.

Service...

Conjure up a veritable outdoor dining room with the range of 1800 tables: the bistrot and square tables are suited to smaller spaces while the square and rectangular tables can seat 4 to 8 guests, or more by placing them side by side. The practical console holds bottles and tableware during the course of a meal. The curvature of the backrest in the chairs and armchairs, the detailed execution and the lightness of the design are a nod to the classic elegance of the Directory.

Add a touch of modernity with powder-coated aluminium and the result is one of Tectona's emblematic collections.

Absolute...

The classic structure of the 1800 collection is found in this sun lounger in powder-coated aluminium. Visual discretion abounds: the mechanism offering four backrest positions and the castor wheels on the rear legs are seamless parts of the whole. The comfortable white mattress, specially treated for outdoor use, is the perfect match.

Practical to use, light, easy to move...the qualities of the 1800 collection are upheld and here channelled into the art of relaxation.

Goa

The history behind the collection

This lounge, part of the Tectona repertoire since the 1980s, was brought up-to-date by Alexis de La Falaise in the early 2000s. It draws inspiration, for its forms as well as its construction, from furniture of the Arts and Crafts movement, which emerged in Great Britain in 1888 and sought to revive craftsmanship, to create objects and furniture that were both beautiful and useful.

Handsome craftwork

The extremely minimal design of Goa is a masterpiece of equilibrium that highlights the woodworking talent within Tectona. The lines, simple and obvious, intersect without jarring visually while also concealing the astute mechanism providing two reclining backrest positions. The sand colour of the seat and backrest cushions in combination with the natural teak colour sublimates the natural beauty of this now-emblematic collection.

Leeds • Jeeves

Practical elegance

Designed to make your outdoor life easier, the Leeds console keeps your objects within easy reach, whether they are tableware for a meal, magazines and towels for relaxing poolside or perhaps even tools for a spot of gardening. The classic design in teak means that Leeds blends in gracefully with all Tectona collections.

Indispensable and discreet

Moving the Jeeves drinks trolley is a quiet and smooth task, thanks to the well-thought-out suspension units between the legs and the castor wheels. Two removable trays are integrated into the upper level allowing you to lay and clear a table with efficiency. The lower level features two compartments for holding bottles. Jeeves is made in teak, a guarantee of sturdiness and resistance necessary for the outdoors.

Leeds Console 140 x 40 cm

Leeds Console 90 x 40 cm

Arlington

Design lesson

Arlington teak tables, fixed or extendable, embody the fundamental principles of design: form and material perfectly adapted to the intended use. The leg assembly, inspired by traditional English models, was carefully designed so as to maximise your leg comfort while ensuring maximum stability – support is provided lengthwise, widthwise, crosswise, by the battens resting on the floor. The fixed leg assembly (dowelled mortise-and-tenon joints) is a sign of longevity for year-round outdoor use.

Butterfly table

An ingenious system using so-called «butterfly leaves» is concealed below the tabletop of the Arlington extendable table; when deployed, the table provides spacious seating for 10 to 12 guests. This tried-and-tested system is easy to use and resistant to humidity variations.

Extendable table 200-300 cm x 110 cm
10 to 12 people

Arlington...

The two Arlington fixed models, a large rectangular table and a small square table, have the same width (90 cm) and thus complement each other. For this reason, they can be joined together to seat more guests when necessary. Used alone, the small table forms a children's corner or an intimate setting for two people. Both models have a hole cut into the tabletop; when the sun becomes too much, you'll appreciate the ability to add a parasol.

...tables offering several possibilities

Fixed table 180 x 90 cm, 8 people

Fixed table 90 x 90 cm, 4 people

Wilson • Bampton

Wilson benches and stool

A discreet and easy-to-use bench. You can use it alongside the Arlington table then move it under the table to make space. Alternatively, you can use the bench in a stand-alone manner: place it against a wall to enjoy some shade or soak up sunshine, as you prefer. The stool can be used as seating or as a small practical easy-to-move table.

Bampton chair

Its silhouette, simple and obvious, allows it to blend into any setting, whether classic or contemporary. Discreetly, the gently curved line of its seat signals its comfort.

Wilson bench 120 cm
Wilson bench 150 cm
Wilson bench 180 cm

Bampton chair

Wilson stool 43 x 43 cm

Barkley • Barton

A circle of friends

The Barkley tables complete the Arlington and Sterling collections by offering round tabletops on the same type of support structures. The fixed leg assembly (dowelled mortise-and-tenon joints) is a sign of longevity for year-round outdoor use. The round shape encourages guests to talk with one another, freely and without constraint. The tabletops have an aperture to hold a parasol.

Barton folding chair

Round table Ø 90 cm

Round table Ø 150 cm

Barton...

Barton has preserved its classic form while adapting to the necessities of outdoor use such as ease of use. It features thick wooden sections, mortise-and-tenon joints and a safety latch to stop fingers getting squashed. It has been present in the catalogue for over 40 years. Quite simply, a timeless classic.

...folding chair and armchair

Barton folding armchair

Round table Ø 110 cm

Sterling

For «oval», read «friendly»

The Sterling table is constructed along the same principle as the Arlington table: table legs carefully designed to maximise leg comfort and battens at floor level ensuring exceptional stability. Where the Sterling table differs is in the shape of the tabletop: oval, for a more informal ambience.

The fixed leg assembly (dowelled mortise-and-tenon joints) is a sign of longevity for year-round outdoor use.

Gateleg

A boon for smaller spaces!

The Gateleg folding table—a tabletop consisting of two movable flaps and a folding leg assembly—will breathe life into your patio or balcony. Open it up with a simple manoeuvre when you want to enjoy a meal or drinks with guests.

In the folded position, it takes up very little space. The table is perfectly stable, combining teak's robustness and sturdiness with ingenious practicality.

Folding table 150 x 100 cm

Camarat

Follow the sun

Sun worshippers, rejoice! The Camarat sun lounger, available in two sizes, is easy to move so you can easily keep up with the sun's movement! It is manoeuvred like a wheelbarrow, thanks to the rubber-rimmed wheels fitted to the rear legs and the projecting portion of the long edges that serve as handles. Five reclining positions are available. For additional comfort, it can be fitted with pivoting retractable armrests that tip back without blocking your movement when you sit up, or with a removable tray that can be placed along the long edges.

Adirondack

An American legend

American cinema is fond of this armchair – in the collective imagination, it represents infinite possibilities. On a porch facing the Great Plains or mountains on the horizon, the Adirondack chair is both welcoming and imposing, a fragment of the American Dream.

At Tectona, we evaluated its comfort and improved it by creating additional pieces: a footrest that transforms the armchair into a lounger and a small folding table should you require more space than that provided by the wide armrests.

Armchair with footrest

Folding low table 60 x 50 cm

Normandie

Take a long trip

Once comfortably installed in your generously proportioned steamer chair, close your eyes to be transported to the deck of a transatlantic liner connecting Le Havre with New York at the start of the 20th century! This teak steamer chair does not require any particular care. Its curved contours closely follow those of the human body in order to maximise comfort; a mattress is optionally available for additional comfort. After lifting the armrests slightly, lean backwards to set the position of the backrest to suit the occasion, whether that be conversing with your neighbour, reading or simply daydreaming. When summer is over, the steamer chair folds easily and requires only minimal storage space.

Cortina

The essence of the countryside

Cortina is inspired by large farm tables, which have become mythical objects as a result of the infinite images conveyed in paintings, literature and films set in the countryside. It is perfectly suited to large gatherings of family and friends. The table is made from teak, sanded and silvered. Support is provided by solid sloping legs, in the form of a trestle. The collection also includes a bench and a stool constructed the same way.

Rectangular table 200 x 90 cm
6 to 10 people

Bench 200 cm

Stool 80 cm

Aladin

An essential accessory

This teak chest is the ideal storage solution and it blends in harmoniously with all our teak furniture. Practical features abound: a lock; a mechanism to hold the lid open thereby preventing bodily injury; and silicone joints for full watertightness, protecting cushions from morning dew and rain showers.

Rectangular chest 132 x 74 cm

Backrest cushions

Versailles

Ideal for your plants

This classic planter is made from teak, a non-rotting wood that guarantees its longevity. It is available in two sizes: the small one is perfect for rose bushes, box tree balls and small shrubs; the large one is better suited for plants requiring more space such as citrus fruits, topiaries and columnar fruit trees.

Planter 52 x 52 cm

Planter 60 x 60 cm

Terracotta pots

The beauty of terracotta from Tuscany

The collection of terracotta pots consists of three vases and one jar made in Tuscany using traditional terracotta techniques: each piece is handcrafted by an artisan and is unique. When they are removed from the high-temperature kiln, a beautiful natural colour develops along with a velvet-smooth weathered texture due to the quality of the clay used during moulding.

The pieces are highly resistant, and also conserve the humidity necessary for plant growth. Their classic, elegant appearance blends into any garden or patio.

Cantina Vase Ø 75 cm

Colonna Vase Ø 80 cm

Colombier

The essential birdhouse

Birds in your garden will be drawn to the dovecoat. It is high enough for them to feel protected, while the zinc roof provides rain protection. On the lower level, the size of the opening allows them to bring in the twigs they need to build their nest. They can fly off from the upper level, through a smaller opening. The dovecoat, made from teak, withstands sunshine and rain. Stabilisation and wind resistance are provided by a clever fixation system that can be used on all types of terrain.

Dovecote H: 220 cm

Biblos

For bibliophiles

Biblos is a rotating and mobile indoor bookcase made from satin-varnished teak. The obelisk form invites you to take a trip to Ancient Egypt, to pay homage to the famous library of Alexandria. It was designed by a book lover: it holds books of any size along its entire height, from your favourite pocket-sized novels to your favourite oversized artbooks, all of which are easily viewed and rapidly pulled out.

By Alexis de la Falaise

An aesthete driven by a love of art and design and a passion for the history of decorative arts, Alexis de La Falaise (1948-2004) collaborated with Tectona in 2000. His keen eye and inspired lines are behind the rejuvenation of certain traditional models, such as the Goa collection, and paved the way for Tectona's future collaborations with designers.

Bookcase
For indoor use only

NEW

Grande Écurie - Versailles

Classic heritage

Grande Écurie - Versailles was inspired by two oak benches belonging to the heritage collections of the Château de Versailles.

Both had eventful lives before being honoured by Tectona.

One resided in the stables of the Château de Saint-Cloud before moving to Versailles before 1855. The other began at the Petites Écuries de Versailles, was sent to the Garde-Meuble before 1833, then returned to the Château de Versailles during the Second Republic (1848-1852). The bench, of simple design, can be distinguished by the form of its legs evoking the stylistic influence of Maison Jacob-Desmalter, principal supplier to palaces since the middle of the 18th century.

Contemporary uses

In the hands of Jean-Yves Grandfils, a Meilleur Ouvrier de France exercising his talents at Tectona, the Grande Écurie - Versailles bench has now been adapted for use by the general public, including visitors to the Château de Versailles and private individuals. Some changes were made: the seat, originally in velvet, is now wooden but the visual impression remains unaltered. The use of mortise-and-tenon joints, in accordance with traditional cabinet-making techniques, is preserved, in order to provide the required sturdiness to this historic bench.

Bench in polished oak 183 cm
For indoor use only

Bench in solid teak 183 cm

**BY EDWARD BARBER
& JAY OSGERBY**

Both were born in 1969 and in 1996 they founded their design and architecture studio. In 2012, their torch illuminated the Olympic Games in London. Although known for their constant quest for innovative technologies, they reconnected with traditional woodworking for the Tecto bench, drawing inspiration from wooden roof frames.

Tecto

Airy structure

Tecto is a good illustration of Tectona's devotion to the craft of woodworking. Assembly is by dowelled mortise-and-tenon joints as traditionally used in roof frames, while the detail of the wooden plugs inserted in the direction of the grain to conceal screws provides an unhindered view of the bench structure. The arrangement of the horizontal teak slats, a subtle interplay between solid and empty lines, is captivating. As for function, the bench is an invitation to relax: the high backrest and the gently inclined seat maximise comfort.

Bench 180 cm

TECTO

Bench 180 cm
Option: seat cushions

Exbury

British chic

This model has been a faithful companion to Tectona since the very start, in 1977, when the brand was renewing the repertoire of outdoor furniture drawing inspiration from across the Channel. Exbury has since then become one of Tectona's great classics. The highly imposing teak sections, cut from single blocks, are assembled according to woodworking rules, without metallic items, which confers a solid and elegant presence and at the same time guarantees exceptional longevity.

Bench 180 cm
Option: seat cushions

Glenwood

Strict elegance

The Glenwood bench was designed with beauty and comfort in mind: the seat is wide and deep; the backrest is sufficiently high to support the back; and the armrests are gently curved for added comfort. The use of dowelled mortise-and-tenon joints and the sculpting of the rear legs, cut from a single block of teak, are features that not only guarantee stability but also all-weather resistance for a long life outdoors.

Lausanne

A classic with a modern twist

Lausanne is a reinterpretation by Anthony Guex of the classic Glenwood bench by Tectona, itself referencing English garden benches.

Drawing on his cabinetmaking experience, the young designer left the teak structure of the seat and the leg assembly unchanged. The original forms of the backrest and the armrests were also preserved but made from painted aluminium.

Behold the result: a spectacular rejuvenation of a venerable bench!

BY ANTHONY GUEX

After practicing as a cabinetmaker for seven years, Anthony Guex studied interior design at the University of Art and Design of Geneva and, at the same time, design at the prestigious Lausanne University of Art and Design (ECAL). After completing his studies in 2015, he founded his own design studio in Lausanne.

Circle Bench

Another collection, another slice of history

Although circular benches were in vogue in large French gardens in the 18th century, located in groves or in outdoor «rooms» (cabinets de verdure), they remain intimately associated with scenes from the English landscape: in picturesque village squares, in front of churches, even in cemeteries, encircling centuries-old trees and inviting passers-by to sit down a while to meditate, to rest or perhaps just to take in the view.

Semi-circle bench

Circle bench

An absolute...

Circle Bench is a good illustration of the high woodworking standards practised by Tectona since its creation in 1977. The crossbeams and the seat slats are not simply arched but carved from the block; this technique guarantees the bench's stability and durability over time. The simplicity of its design, the unrivalled craftsmanship and its longevity have together elevated the Circle Bench to the status of absolute icon.

...icon

NEW

Marly

Another collection, another slice of history

Featured in the authoritative treatise on furniture making, *L'Art du menuisier*, written by the cabinetmaker André-Jacob Roubo (1739-1791), the Marly bench was an integral part of parks and French gardens which would come alive at dusk on feast days celebrated during the Age of Enlightenment, scenes immortalised in the paintings of Hubert Robert.

Life in the château

Woodworking masterpiece, the Marly bench renders tribute to French classicism. Perfect balance between the width of the seat, the height and the depth of the bench, gently integrate it into landscape. Refined, file sizes take the form of balusters. As for the armrests, S-arched and decorated a moulding at their end, they well finish the silhouette of this bench out of the ordinary.

Bench 240 cm

Lancaster

Another collection, another slice of history

The architectural work of Edwin Lutyens includes several administrative buildings in England but also in New Delhi, as well as countless private residences whose gardens were created by the very famous gardener, Gertrude Jekyll, including Bois des Moutiers in Varengeville in 1898.

From London to New Delhi

The unique silhouette and simplified forms of the Lancaster bench were designed by the architect Edwin Lutyens (1869-1944), who drew inspiration from Neo-Classical English furniture, itself influenced by India, and from Arts and Crafts furniture. The traditional elegance of English furniture is given an exotic touch by the curved back evoking the pediments on the facades of certain Hindu temples.

Bench 195 cm

Bench 180 cm

London

Simple but undeniably sophisticated

The London bench is the fruit of the labours of highly skilled craftspeople. Visually speaking, the simple structure of the seat emphasises the sophisticated geometric design of the backrest: the interplay of vertical and horizontal lines enclosing three circles, reminiscent of a ship's portholes, naturally draw in the viewer's attention to reveal unexpected perspectives.

It is inspired by garden benches popular in England since the 19th century.

Bench 150 cm

Muse

Simple and ingenious

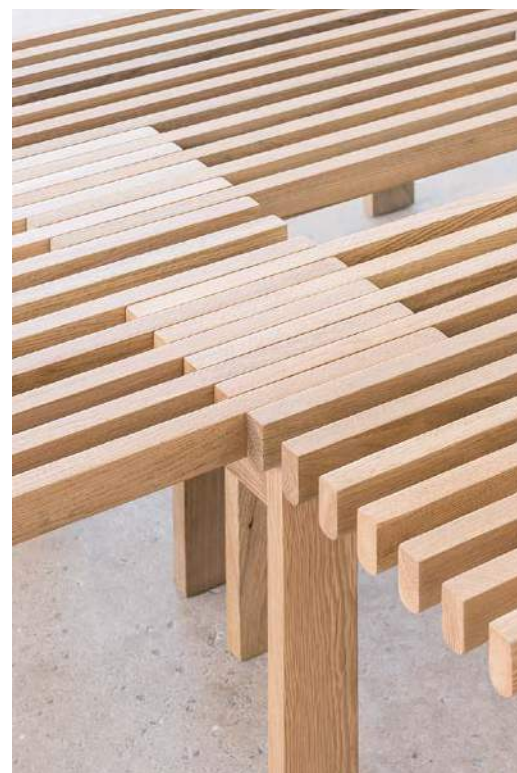

Muse is our collection of oak modular benches for indoor use. Each bench has 11 slats that have been cut and assembled under high-precision digital control such that the spaces between the slats and the actual slats are the same width.

As such, you can combine two, three or any number of benches to adapt perfectly to any setting. The 2-component varnish confers very high shock-resistance.

BY ISABELLE BAUDRAZ

After completing jewellery studies, Isabelle Baudraz entered ECAL, the famous Swiss school of design. In her second year of study, in 2017, she took part in a competition organised by ECAL and Musée National Picasso-Paris for the renewal of the museum's seating. Her bench, Muse, received unanimous acclaim from the jury, not only for the ease with which it can be moved and its solidity, but also for its ability to blend in harmoniously with the 17th-century architecture of Hôtel Salé and with the decorative elements by Diego Giacometti.

Bench 110 cm

Bench 75 cm
For indoor use only

Tennis

Diverse usages

In 2006, during the gestation of Tennis, Pierre Charpin told us: «the design of the umpire's chair and the players' bench provides simple formal and constructive responses». Their frame structure, in tubes of powder-coated aluminium, occupies space in an airy, elegant and contemporary manner. Consistent with the designer's passion for colours, green highlights the forms of the furniture in harmony with its natural surroundings.

BY PIERRE CHARPIN

Since the 1990s, Pierre Charpin has been designing objects that reflect his adherence to formal standards and his extreme creative freedom. He is in demand by the biggest international brands and was named Créateur de l'année in 2017, reflecting the universal acclaim he enjoys among design professionals.

Copacabana

Here comes the sun

Joyful and colourful, simple and practical, the Copacabana line combines the solidity of teak with the softness of fabric. No aspects of the deckchair have been overlooked to ensure your comfort: the long armrests, the generously wide seat, the inclination of the backrest...

Copacabana is light and folds easily, so is easy to move around. Just perfect for those days where the most arduous decision you have to make is where to sunbathe.

BY CHRISTOPHE DELCOURT

Deckchair

Footrest

Joyfully...

At first glance, the Copacabana folding deckchair could easily pass for the traditional deckchair that inhabits so many summer holiday memories.

However, several tweaks have been made for added comfort and ease of use: the armrests have been designed to allow the arms to rest naturally; the backrest has three reclining positions, guaranteeing stability. The fabric, specially treated for weather-resistance, simply refuses to age.

...indispensable

For a tête-à-tête...

Used alone, the Copacabana small folding table is perfect for two people or as a side table. Alternatively, several tables placed side by side create a single large table for several guests. The legs, in the form of an X, fold easily; the table then only requires a small space for storage.

...or large gathering

Folding table 80 x 70 cm

Southampton folding armchair

Another collection...

The Southampton collection was imagined by Christophe Delcourt, with the exception of the nesting tables and –new for 2020– the lounge armchair. It is characterised by geometric simplicity evoking Art Deco furniture of the 1930s. However technical features to maximise ease of use situate this collection firmly in the modern era: the sliding leaves of the extendable table; the table's easily detachable legs for minimising storage space; folding armchairs; stackable sun loungers fitted with hidden castors... In short, the models of this collection are perfectly adapted to their natural habitat: the outdoors.

...another piece of history

Southampton

Elegance in comfort

Teak is used throughout the Southampton collection, exclusively in tables and in combination with other materials in seating pieces and the footrest.

Elegant simplicity characterises all pieces in this collection; contours are designed with maximum comfort in mind: gently reclining backrests; the crosslegs of the folding tables; the soft and durable Batyline fabric used in seating pieces and the footrest.

The Southampton collection is available in

- *Duo Ecru Batyline*
- *Eden Taupe Batyline*

Set of 3 nesting tables

BY CHRISTOPHE DELCOURT

> Designer profile p.133

Perfect...

The Southampton table is ideal for bringing relatives and friends together around one table. In the standard configuration, two leaves lie under the tabletop, one at each end of the table. To extend the table, you just have to slide them out, then add the required number of folding armchairs (from the same collection – naturellement!). For ease of storage, the legs can be unscrewed from the table then placed snugly under the tabletop.

...for large get-togethers

Rectangular extendable folding table 200-300 x 100 cm

BY CHRISTOPHE DELCOURT

> *Designer profile p.133*

Spontaneity...

When the sun makes an unexpected appearance, it is simplicity itself to remove the table and armchairs from storage, carry them outside and open them up!

The crosslegs confer visual lightness and elegance; in combination with a double-locking system, they guarantee maximum stability. Batyline fabric, used in the armchairs, is comfortable, soft to the touch and ultra-resistant.

The crossed leg assembly of both models makes folding and unfolding a quick and easy process.

BY BIG GAME

BIG-GAME was founded in 2004 by three ECAL design graduates: Elric Petit, Grégoire Jeanmonod and Augustin Scott de Martinville. Since then, the creative energy infused in their work has won over some of the biggest names in design in Europe and Japan. No category of objects is off-limits: from furniture and kitchen knives, to stationery and watches. The trio approach every project with the same delight.

Clubhouse

Audacious sobriety

Clubhouse, in teak with metal reinforcements, was the first collection designed by BIG-GAME for the outdoors. In response to Tectona's requirement that the furniture be suitable for small spaces, the design conceived by BIG-GAME is minimalist to the extreme. The sobriety of the lines, the practicality allowing chairs and armchairs to be easily stacked and the compactness of the table leg assembly together make Clubhouse suitable for daily use in more modest spaces...

Rectangular table 140 x 70 cm

Stackable armchair
Seat and backrest cushion

Square table 70 x 70 cm

Stackable chair

Sun lounger

Sun lounger mattress

Low table 50 x 50 cm

The art...

The design principle is that of the Clubhouse collection: simple lines stripped of unnecessary detail for use in all settings, alongside the swimming pool, at the beach, on a city patio or in the garden. The generous width of the chair, supported by a solid leg assembly, is synonymous with comfort as is the backrest with two reclining positions. Options include a mattress for added comfort and a small low table.

...of the obvious

Exeter

Another collection, another slice of history

The Exeter furniture collection has flourished since its first appearance in 2003, with the constant addition of new models. With the modular lounge, everyone has the freedom to create their own space, according to their mood and their needs. The woodworking talent of Tectona is apparent from the width of the teak sections and the width of the legs, cut from a single block.

2 corner units and 2 seat units

1 corner unit and 4 seat units

Footrest

Room...

The Exeter lounge is designed to be arranged just as you like and to grow with your needs. It follows the same design language as the Exeter and adds a large dose of practicality. The depth of the seat along with backrest and footrest cushions invite you to relax. For added comfort in 2020, combine your existing sleeper set (corner unit, angle unit, footrest) with the new sleeper cushion set.

...for everyone

Corner unit

Seat unit

NEW

Sleeper set

Coffee table unit 74 x 74 cm

Quiet ...

Thick-cut teak sections create powerful, elegant structuring lines that are softened by the arresting simplicity of the wide slats and the slanting of the legs. The backrest of the bench and armchair is slightly curved for added comfort – cushions not required! Simple and obvious, Exeter perfectly symbolises the Tectona style: the perfect equilibrium between «classic» and «contemporary».

... strength

Rectangular coffee table 120 x 90 cm

Bench 180 cm

Low armchair

Simple...

Visual elegance is exemplified in the Exeter table and stackable chairs, their wide slats exerting a calming effect on the viewer. The interplay between the curved legs and armrests of the chair add a dash of intrigue to the sober, contemporary lines.

BY THINKK STUDIO

Winner of the design competition organised by Tectona in 2017, THINKK Studio was founded in 2008 in Bangkok by Decha Archjanun and Ploypan Theerachai. Decha Archjanun, a graduate of ECAL, is drawn to form and design, whereas Ploypan Theerachai, who studied design in Sweden, is passionate about materials and is drawn to detail. Both firmly believe that design should adopt a technological approach backed by a solid understanding of manual techniques.

Batten

An emblematic collection

For this design duo, battens are the ultimate symbol of outdoor furniture. The Batten collection, in teak, exudes an ethereal quality, thanks to the spacing between the battens and also the tapering of the legs of the seats and the table. Elegant in its simplicity, comfortable and joyful, Batten illustrates the traditional woodworking skills practised by Tectona, including use of mortise-and-tenon joints.

Armchair

Square table 100 x 100 cm

Rectangular table 240 x 100 cm

Two-seater sofa

Rectangular coffee table 100 x 56 cm

Fireside chair

Sober...

The lounge completes the Batten collection launched in 2017. The principles remain unchanged, namely furniture in teak, with an ethereal design, easy to move and fabricated to highest woodworking standards. The wide battens in the seat and backrest provide great comfort, supplemented here with the cushions in Batyline. The tapered legs lighten the ensemble visually.

...and generous

Low armchair

Iremo

Luxury, tranquillity and voluptuousness

Iremo, «tranquil» in Greek, treats teak as a precious material set in an aluminium structure the colour of the Aegean Sea. The welcoming curves of the armrests and the ideal depth of the seating are conducive to endless hours at the table in company or simply contemplating the open sea. The table features teak slats radiating outwards from a central aluminium circle: an ode to the sun.

BY TINO ZERVUDACHI

Tino Zervudachi has exercised his talents as a designer and as a decorator worldwide on an impressively diverse range of projects: historic English residences, Alpine chalets and private mansions. Other projects have included the Royal Opera House and the Victoria & Albert Museum, both in London. His work is infused by an elegant classicism, a natural corollary of living in Hydra for half of each year.

Round table Ø 120 cm

Chair

Here comes...

The ensemble evokes the sensual beauty of jewellery, with precious teak set in an aluminium mounting. The blue of the aluminium, evoking the sky and the sea, sublimates teak's natural colour. The perfectly matched proportions of the chairs and the table, the comfortably wide seating, the cushions, the intimacy encouraged by the circular form... all these are valid reasons for spending many hours at the table.

...the sun

Low armchair

Eternal...

The Irema lounge is the fruit of a quest for an ensemble that would sublimate the beauty of its surroundings. Teak is set in aluminium in a manner analogous to jewellery; refined and sensual thanks to generous seating, wide and deep, and to the curved and full armrests. The table is an ode to the sun, with teak slats radiating outwards from the central aluminium core. Three nesting tables complete the ensemble and will further entice you to spend magical moments under the sun.

...chic

Two-seater sofa

Nesting tables

Poetry ...

Undulating finesse defines the Cicala collection in teak and stainless steel. The heavy wood components are in perfect equilibrium with the sleek curves of the stainless-steel structure. The welcoming armrests are suitable for balconies, urban gardens, the poolside area, outdoor areas of cafes...the Cicala collection infuses outdoor living with urban, contemporary poetry.

... in curves

BY JULIE RICHOSZ

After graduating from ECAL, Julie Richoz assisted Pierre Charpin for three years before opening her own design studio in Paris in 2012. In the same year, she won the Grand Prix du Design at Villa Noailles. The diversity of her creations are a testament to her passion for the infinite palette of materials, including glass, ceramic, tapestry and teak. Case in point: for Tectona, teak was combined with stainless steel and granite.

Cicala

The grace of suggestion

The sleek and rigorous design of Cicala lend an almost-ethereal quality, further underlined by the sensual undulations of the stainless steel structure of the legs and armrests, painted in black. The teak slats, most remarkably the single slat forming the backrest, contribute to the tangible equilibrium between lines and volume. Elegant and practical.

Round table Ø 80 cm

Stackable armchair

Grasshopper

Optical illusions

The Grasshopper collection, in powder-coated aluminium, represents a romantic disposition, via its contours evoking the silhouette of a grasshopper, and unflinching design rigour. Perforations in the tabletop and in the seat and backrest of the chair create a slight defocused effect, sublimated by rays of sunshine.

Colour escapism

The Grasshopper collection, in powder-coated aluminium, is all finesse and freshness, an aesthetic created by a structure drawn from aerodynamic lines, ethereal perforations in the aluminium and the gentle green colour. Comfort is not overlooked, far from it: the wide seat, the curved backrest and the generous dimensions of the table are an invitation to relax.

BY WIEKI SOMERS STUDIO

Wieki Somers and Dylan van den Berg, graduates of Design Academy Eindhoven, created their studio in 2003. They belong to the new generation of Dutch designers who reinterpret, with insouciance and humour, the everyday environment, particularly the garden. This approach has won praise from MoMA in New York, Centre Pompidou in Paris and the Victoria & Albert Museum in London. It is they who introduced Tectona to the coloured material that is powder-coated aluminium.

Chair

Rectangular table 160 x 90 cm

Cliff

Modular screen

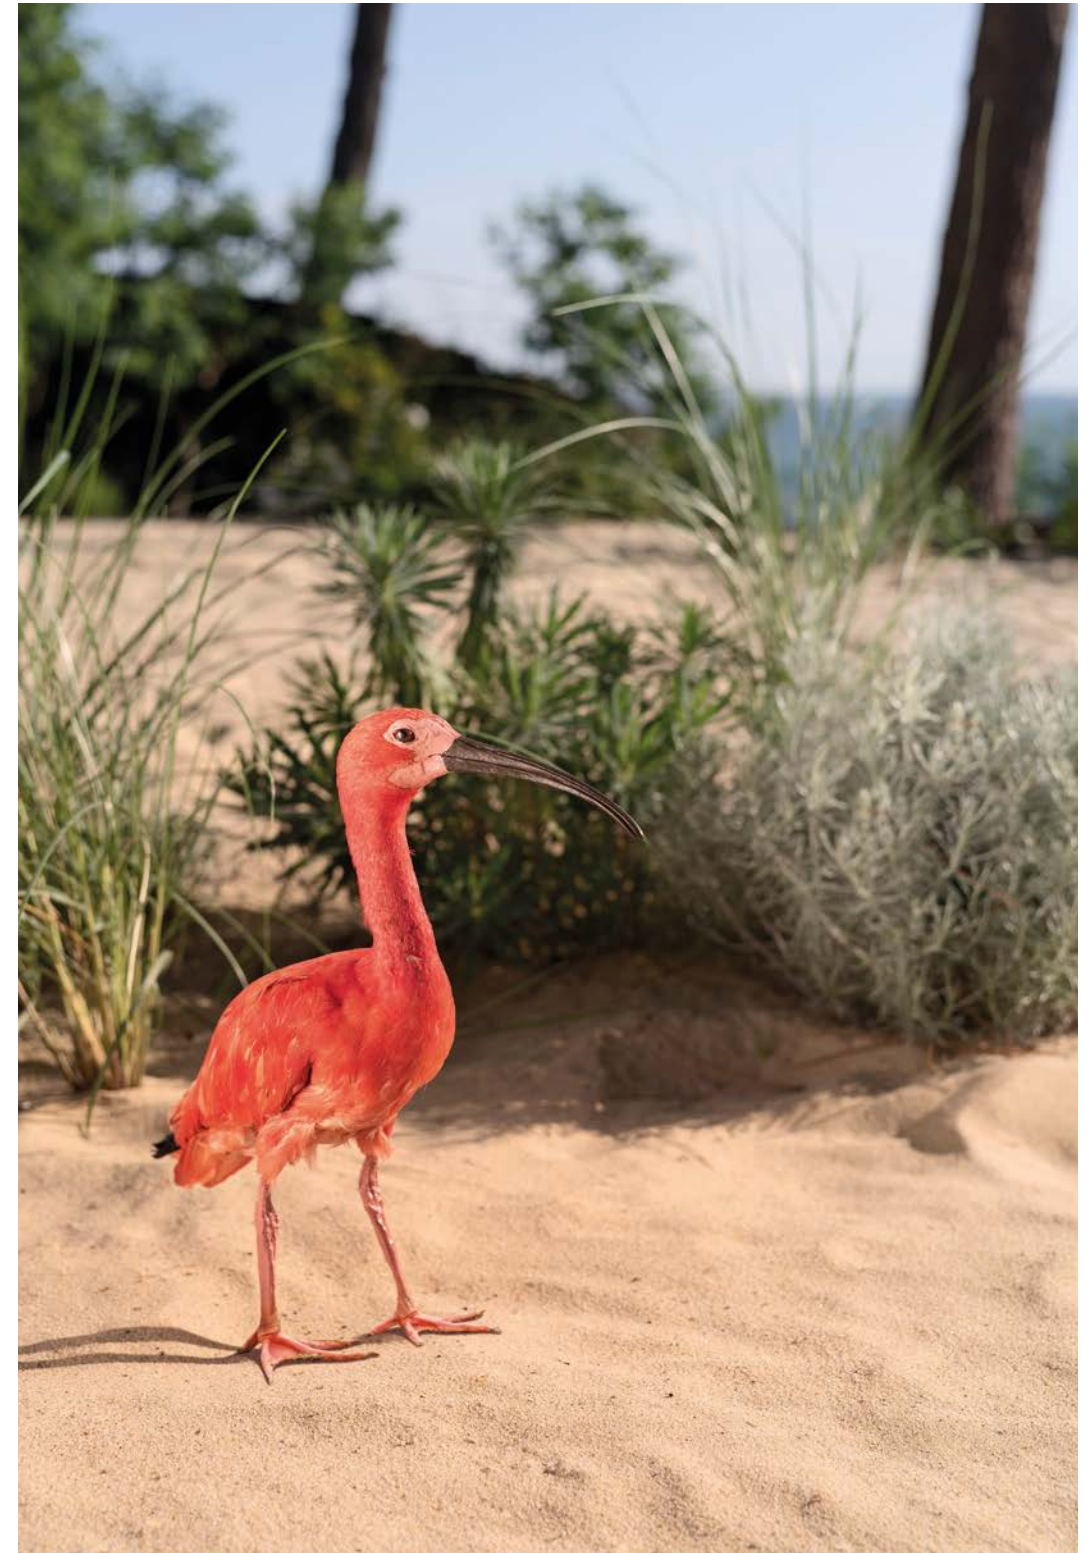

When you want to keep prying eyes out, hide part of your garden or patio, or shelter yourself from the wind, look no further than the Cliff screen. Panels are sold individually and are easy to join using the supplied stainless steel hinges.

Each panel consists of ecru Batyline fabric mounted on a teak frame.

An elegant piece of furniture, discreet and practical, for private moments.

Panel for Cliff screen 160 x 60 cm

Stackable chair

BY CHRISTOPHE DELCOURT

Christophe Delcourt has been collaborating regularly with Tectona since the start of the 2000s, renewing its formal repertoire. Some of the flagship collections he has designed for Tectona include: the elegant Exeter low armchair in teak, the generous Shanghai sofa in woven resin on aluminium and the emblematic Southampton sun lounger in teak and Batyline fabric.

Shanghai

**Another collection,
another piece of history**

Mastery of design, intimate knowledge of the material –here woven resin–, respect for the usage and of course a passion for craftsmanship are all evident in this collection by Christophe Delcourt. These aspects underpin the creative dialogue established in the 2000s between the designer and the maker; a meeting of minds that has grown ever closer.

Low armchair

Square coffee table
110 x 110 cm

Fireside chair

Three-seater sofa

The grandeur...

The classic and contemporary Shanghai collection has enjoyed much success since its launch in 2013. Rigour and softness are manifest by the generous proportions and the perfect equilibrium between straight and curved lines. A perfect collection that transcends the superficiality of fashions to impose a clear design at the service of comfort.

...of lines

Subtle...

The Shanghai sun lounger in woven resin blends in naturally into its environment. The backrest offers 4 different positions while the rear castor wheels permit easy movement. For additional comfort, a mattress in sand Sunbrella is available as an option. Naturally, like all pieces in the Shanghai collection, the basketwork is impervious to rain, sea spray, suntan oil and chlorine from swimming pools.

Colonial

Another collection, another piece of history

Colonial highlights the contrast between fluid forms and the rigour of teak furniture. It was decided to replicate the famous Lloyd Loom design and at the same time adapt it to woven resin, a new technological and recyclable material that replaced the woven strips of kraft paper used in the original version. Visually, the woven resin evokes traditional cane work in rattan or wicker; functionally, it provides complete resistance to the elements.

Tropical exoticism

The soft and sensual curves of the Colonial collection replicate well-known Lloyd Loom furniture. Back in 2004, it was the first collection launched by Tectona in woven resin on aluminium. The broad lines of the sofas and fireside chair, the embrace of the studio armchair, the drink taken at the coffee and side tables... for over 15 years, Colonial has epitomized the outdoor lifestyle.

Fatback

Influences? Japan!

Fatback is an audacious reworking of the traditional futon and tatami of Japan: the tatami has become a sun lounger whose backrest provides storage space for the futon. In parallel, its purpose has evolved from sleeping to relaxing. The texture and resistance of the materials used—woven resin on an aluminium frame—are ideally adapted to the constraints of outdoor living.

BY NENDO

The Nendo collective was founded in 2002 by Oki Sato, an architect who caught the design bug. The word, meaning «modelling clay» in Japanese, underlines the intent to manipulate forms, to change their initial vision to create a free, original story. Nendo fully subscribes to that aspect of Japanese culture that eliminates the superfluous and reduces forms to their minimum expression. In relation to design, Oki Sato believes that his role is to make the world and people happy...

Footrest

Sun lounger/backrest

**BY RONAN ET ERWAN
BOUROULLEC**

Since the start of their collaboration in 1999, the Bouroullec brothers have won over the world of international design with their innovative creations, most recently in 2019 with the inauguration of their sensational fountains on the Champs-Élysées in Paris. They continue to reinvent the everyday, producing amazing yet obvious objects. In 2008, they designed the Pebble collection for Tectona.

Pebble

An «obvious» collection

This avant-garde project was very loosely inspired by the round form of the Circle Bench, one of Tectona's icons. The round platforms of the Pebble collection, in woven resin on aluminium, evoke upside-down baskets for some and pebbles on the seashore for others.

The welcoming contours of the pebbles form an original, gentle and poetic setting and invite you to daydream. Pebble is an ode to serenity, the art of lazing in the sun, without constraints but with originality!

Sunbird

Contemporary elegance

The forms of the Sunbird collection are inspired by those of the now-famous Roma collection; the difference, which lends a resolutely contemporary look, is the structure in anodised aluminium and the Teflon-treated acrylic canvas. The reinforced eyelets and the lining of the canvas confer great wind resistance.

The canvas itself is easy to remove, whether to be cleaned or changed.

Three models are available, the smallest of which, measuring 2 m x 2 m, is particularly well suited to urban patios of modest dimensions.

Square parasol 3 x 3 m
Square parasol 2 x 2 m
Round parasol Ø 3 m

Bases

Florida

High wind warning!

When parasol makers employ cutting-edge technologies usually used by the nautical industry, the result is Florida! The eponymous US state is known for its gusty winds in the winter. The parasol's wind resistance is provided by the aluminium structure, the Textilene canvas but also the ideal proportions.

Round parasol Ø 2,6 m

Square base 45 kg

Colibri

For large gatherings

The dimensions of the acrylic canopy (4 metres in diameter) make Colibri perfect for shading eight to ten people at the table; at the same time, it remains light due to the ribs in aluminium. A crank-operated system requires only minimal effort to open and close the parasol.

Furthermore, the mast, in varnished wood, can be pivoted around its axis so you can keep the table shaded throughout the course of the day. Storage sack included.

Round cantilever parasol Ø 4 m

Flamingo

Sunshine with occasional showers

The Flamingo parasol is completely impervious to the weather thanks to its aluminium structure and polyester canopy. A handle integrated into the mast makes opening and closing the parasol easy. The mast is also mounted on a pivot allowing 360° rotation: all-day sun protection is simple to implement. Finally, an anodized satin finish softens the brilliance of the aluminium so the parasol blends naturally with its surroundings. Storage sack included.

Square cantilever parasol 3 x 3 m

Tent, wooden mast, 4.60 x 3 m

Butterfly

Outdoor dining room

The chic and discreet Butterfly tent provides shading for alfresco dining. The canopy is supported between two sturdy masts, in either wood or aluminium, and is easy to open and close thanks to the ingenious crank-operated system. It is made from rain-resistant acrylic that is washable. An optional awning, attached to one of the long edges, provides protection from the sun, rain and prying eyes.

Tent, aluminium mast, 4.60 x 3 m

BY INGA SEMPÉ

Inga Sempé, a graduate of ENSCI and designer since 2000, regularly collaborates with the largest companies worldwide (Italy, Japan, France, Scandinavia...) and was named Créateur de l'année in Stockholm in 2012. Her reputation earned her a retrospective at Villa Noailles in 2017. Her mastery of technical processes and her taste for obvious forms manifests in all her creations.

Delta shower with ¼-turn tap

Delta

The handsome archetype

For its first outdoor shower, Tectona turned to Inga Sempé, known for her sophisticated design. The outcome, Delta, is characterised by the absence of the superfluous. Starting from a straightforward teak duckboard, Inga Sempé designed a stainless steel structure simplified to the extreme so that it can blend harmoniously with any setting. The result is obvious and discreetly imposing. The shower connects to an ordinary garden hose.

Éclipse solaire

Sunshine-heated

Éclipse Solaire Teck combines the virtues of solar energy with teak's nobility and resistance in a pure design. The sturdy structure is made from large rectangular-shaped sections, highlighting the natural beauty of teak. A solidly built shower, ideal for classic settings.

Éclipse Solaire shower with ¼-turn tap
Option: Duckboard 75 x 80cm

Marina

The simplicity of squares

The elegance of the Marina shower is due to its minimalist structure in which every element has a square cross-section: the column, the showerhead, the overhead arm and the fixation base. Exceptionally discreet, it blends with its surroundings without being noticed.

Marina shower with thermostatic tap

- With square showerhead 20cm
- With square showerhead 25cm

Option: Duckboard 80 x 80 cm

Quartz

Absolute discretion

With its square-sectioned column and its graphite grey colour, the Quartz shower integrates perfectly into the most contemporary surroundings, alongside a pool, patio, minimalist garden...

Quartz shower with ¼-turn tap
With round showerhead Ø 68 mm
Option: Duckboard 80 x 80 cm

Squadra

For all weather conditions

The Squadra shower features a thermostatic mixer so you can set the water temperature; the position of the showerhead is adjustable. The rectangular section of the column betrays a modernist slant, as does the square showerhead (available in two dimensions). Brushed stainless steel tempers the brilliance of the metal. The piece incorporates a foot shower using cold water. For added comfort, a teak duckboard is available as an option.

Squadra shower with thermostatic mixer and a foot shower with ¼-turn tap

- With square showerhead 20 cm
 - With square showerhead 25 cm
- Option: Duckboard 80 x 80 cm*

Niagara

Voluptuous curves

In the Niagara shower, teak is sculpted into a round duckboard and a smooth-cornered column cut from a single block, highlighting the sensual side of outdoor living. The joy of outdoor showering is enhanced by sensual imagery. In practical terms, the shower is light hence easy to move and it connects to an ordinary garden hose. The water pipe and the showerhead, both made from stainless steel, are resistant to the sunshine, rain, cold and sea air!

Niagara shower with ¼-turn tap and duckboard included

Tropic

Like a monsoon shower

When the sun is blazing-hot, close your eyes and open the tap on the Tropic shower to be transported to a tropical rainforest. The wide column is cut from a single block of teak, evoking the trunk of the tree. Fine continuous rainfall can be simulated through the generous dimensions of the showerhead.

Tropic shower with thermostatic mixer, ¼-turn tap, a handheld showerhead and duckboard included (75x75 cm) (75 x 75 cm)

- With square showerhead 20 cm
- With square showerhead 25 cm

Graphite

Shower spot

The 1m-high Graphite Post is made from matt graphite grey powder-coated galvanised steel. The double surface treatment, carried out at high temperature, creates an effective corrosion-resistant shield that minimises the amount of care required. It is equipped with a cold water tap and a handheld showerhead.

Graphite Post with a ¼-turn tap for foot shower and a handheld showerhead

Option: duckboard in teak 80 x 80 cm

Riva

A must-have

Despite its diminutive size (1 metre high), the discreet Riva rectangular-sectioned post takes up very little space. It is made from stainless steel for ultimate corrosion resistance. Thanks to the handheld showerhead and the low tap, you can refresh yourself under the blazing sun or rinse yourself or your feet when returning from the beach or after climbing out of the swimming pool. The Riva Post is declined with or without thermostatic mixer.

Riva Post without thermostatic mixer, with a low ¼-turn tap and a handheld showerhead

Riva Post with thermostatic mixer, with a low ¼-turn tap and a handheld showerhead

Option: teak duckboard 80 x 80 cm

California

Discreet and effective

The 1 m-high California Post consists of a beautiful teak structure fitted with a tap for rinsing feet and a handheld showerhead. Its proportions make it ideal for small spaces in which teak's colour fits in naturally.

California Post, with a low ¼-turn tap and a handheld showerhead

Option: teak duckboard 75 x 80 cm

Furniture care

The secrets for a long life

Tectona furniture, in teak, woven resin and aluminium, specially designed for the outdoors, is particularly resistant to atmospheric conditions and requires, in most cases, minimal care. Fabrics used in cushions, sun loungers and parasols also require minimal care to maintain their initial sheen. To ensure a long life for your parasols, some precautions must be heeded. As for showers, there are some actions that must be performed in winter.

Teak

Beautiful natural protection

Over time, the surface of teak develops an attractive silver-grey patina as a result of the protective oil naturally secreted by the wood. This oil renders teak fully rot-proof and explains how it came to be used so extensively outdoors, for example in ship decks and of course outdoor furniture.

Care advice

Care is minimal: once a year, clean your teak furniture with soapy water to remove impurities.

To prevent a patina from forming

If you want to maintain the original colour of your furniture, apply Wood Sealant* to slow down the formation of the patina. This product is also effective against stains, particularly on tabletops.

To make the patina disappear

Apply Net Trol** cleaning product, which easily removes the patina and restores the furniture to its original colour.

To eliminate stains

Non-greasy stains can be eliminated with water. Greasy stains require a textile cleaning product.

Tips

- Sanded and silvered teak may have a rustic look due to the presence of knots in the wood.
- Extremely dense, teak does not split; however a few cracks may appear on the surface.
- Teak oil, linseed oil and varnish are not recommended. They do not extend the lifetime of your furniture.

* Wood Sealant 1L

This product, for use with teak, reinforces its colour and prevents the formation of a patina. It renders the surface of the wood waterproof, providing weather-resistance for approximately 2 years.

** Net Trol 1L

This product removes the patina, thereby restoring the wood's original colour.

Powder-coated aluminium

Powder-coated aluminium, cast or in tubes, combines lightness with robustness. The lacquer is applied as a powder and stoved.

Care instructions

Clean with soapy water.

To repaint your furniture

For chips, use the supplied touch-up kit or oil-based paint.

Tips

- Powder-coated aluminium does not rust and can be used at sea-side.
- It is extremely resistant to abrasion.

Parasols

Our parasol fabrics are resistant and water-repellent. Sunbird and Colibri models, and the Butterfly tent have an acrylic canvas, they must be dusted and washed uniformly. Roma parasols, with mast in varnished pine, have a waterproofed cotton canvas.

To store your parasol

To store your parasol roll it up and store in a dry place inside its storage sack or an old sheet; never under any circumstances store it in plastic.

To change the canopy

Contact our after-sales service for a quote.

Woven resin

Woven resin is an unalterable synthetic polyethylene-based fibre, handwoven around an ultralight aluminium frame, making furniture easy to move. It keeps its colour and is fully recyclable.

Care instructions

You can clean your woven resin furniture with soapy water and a brush. Damages to your furniture in the form of cigarette burns or cuts necessitate rewelding (using a soldering iron) or replacement.

Tips

- Furniture longevity depends on light intensity and temperature variations.
- It is highly inadvisable to use abrasive materials (metallic brush) that may scratch your furniture. Solvents and bleach are also harmful to the resin.

Outdoor showers

Care instructions

It is easy to care for outdoor showers. The primary danger to avoid is that of freezing water leading to burst pipes. For this reason, outdoor showers must be winterized: turn off water supplies to the shower; disconnect all of the shower's water inlets; and leave all the shower's taps in the open position.

For showers with a showerhead, we recommend unscrewing the flexible hose from the showerhead so that water does not remain in the curved part of the flexible hose.

For showers equipped with a thermostatic tap, we recommend that you remove the thermostat cartridge because it is the part most sensitive to cold.

For showers in type 316L stainless steel or in powder-coated steel, use a standard stainless steel cleaner.

For showers in wood, we recommend that you clean once a year to remove impurities, using soapy water and a gentle brush.

Outdoor fabrics

Our cushion covers and mattresses as well as all our canvases are designed to withstand water, fatty substances and UV rays. They are easy to clean and keep their colour.

Sunbrella® fabric (100% acrylic)

Sunbrella is a fabric combining softness and comfort as well as a very pleasant feel.

Care instructions

The covers can be washed at 30°C; never spin or machine dry. You can also clean your fabric with soapy water and a soft brush.

Batylane® canvas (90% vinyl, 10% Polyester)

Batylane is an exceptionally resistant fabric that keeps its shape and colour. Its softness makes it a very comfortable furniture fabric.

Care instructions

For Batylane only, use Batylane Clean* to clean and remove stains. Do not use solvents or detergents.

* Batylane clean, spray 500 ml

Product to clean and remove stains exclusively. Leave for 2 or 3 minutes, then brush and rinse with water.

Protective covers

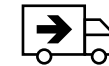

Protect your furniture with our protective covers.

Our furniture is only guaranteed against defective workmanship.

Delivery

Contact delivery service

entrepot@tectona.fr

All countries

Our stock is usually available immediately. We will give you a quote to deliver your order to the location of your choice (sea, air or road). We can arrange delivery to any country.

France, Italy, Spain, Switzerland

Delivery times

The average delivery time is 10 working days for a standard delivery.

Standard delivery

- Standard delivery includes delivery but does not include unpacking or assembly of furniture. The delivery is done by a delivery company to the nearest or most accessible point at the stated address (for small islands, delivery is generally made at the wharf). Delivery companies unload goods but do NOT carry them to upper floors.
- This standard delivery is free for mainland France and Corsica, Italy and Spain for orders in excess of € 1000 inclusive of taxes, as well as for Switzerland for orders in excess of 2000 CHF.

White glove delivery

- This service includes unpacking, assembly and installation of the furniture where you want. It also includes delivery to the upper floors and removal of packaging material.
- Request a quote for White glove delivery service.

Upon delivery of your order

check whether the number and description of packages on the delivery note handed to you by the driver correspond to what was delivered to you. Unpack the goods to check for possible damage during transportation. In the unlikely event of damage or a discrepancy in the number/description, describe them in detail on the delivery note before signing it and then confirm your claim in writing by registered post to the delivery company within 48h. If you do not respect these precautions, your claim will not be processed.

After-sales service

Contact after-sales service

sav@tectona.fr

The after-sales service is headed by Jean-Yves Grandfils, a recipient of the prestigious «Meilleur Ouvrier de France» competition recognizing outstanding craftsmanship. Include name, pictures, and telephone number in your request.

Repair

You can rely on one of our skilled craftsmen to restore your Tectona piece in the shortest possible time.

Spare parts

Spare parts are available for our furniture: specify the concerned furniture.

Change a parasol canvas

2 possibilities:

- Tectona takes your parasol, changes the canvas and redelivers to your home
- Tectona sends the parasol canvas and you replace it thanks to the instructions.

Delivery problems

Contact our after-sales services to solve your problem.

Warranty

All our furniture is guaranteed for 2 years.

Weight: 55 kg

Awning to attach to the width of the tent

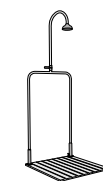

Delta > p.159

- In solid teak and stainless steel

Composition:
• Round showerhead Ø 17,5 cm

Characteristics:
• The shower connects, at its rear, to an ordinary garden hose

235 cm

Teak duckboard: 90 x 90 cm
Weight: 37 kg

Option:
• Inline mixing valve

Eclipse solaire > p.160

- In solid teak

Composition:
• At the rear of the shower is a reservoir in matt black powder coated stainless steel that absorbs the heat of the sun's radiation
• A thermostatic tap on the reservoir supplies mixed hot/cold water directly to the shower (the temperature control is out of reach of children)

• ¼-turn tap
• adjustable showerhead Ø 68 mm

Characteristics:
• The rear of the shower must face the south
• The shower must be connected at the rear of the base
• Reservoir capacity: 17L of warm water and 42L of mixed water

207 cm

Structure: 17 x 13 cm
Weight: 29 kg

Options:
• Duckboard 75 x 80 cm
• Protective cover

Marina > p.160

Composition:
• Square showerhead 20 cm or 25 cm
• Thermostatic hot/cold water tap and a tap for the foot shower.

Characteristics:
• The powder-coated aluminium, with a double surface treatment, confers an effective corrosion-resistant shield, guarantees long-lasting protection and requires very little care
• Water supply: can be connected either at the rear of the base or from below to fixed plumbing

220 cm

Structure: 8 x 8 cm
Weight: 17 kg

With square showerhead 20 cm

With square showerhead 25 cm

Options:
• Handheld showerhead
• Teak duckboard 80 x 80 cm
• Protective cover

Quartz > p.161

- Galvanized steel

Composition:
• Non clogging, adjustable showerhead 68 mm
• ¼ turn tap

Characteristics:
• The powder-coated aluminium, with a double surface treatment, confers an effective corrosion-resistant shield, guarantees long-lasting protection and requires very little care
• Water supply: can be connected either at the rear of the base (can be connected to a garden hose) or from below to fixed plumbing

207 cm

Structure: 8 x 8 cm
Weight: 13 kg

Options:
• Handheld showerhead
• Protective cover
• Inline mixing valve
• Teak duckboard 80 x 80 cm

Squadra > p.162

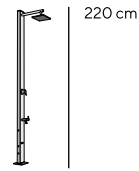

- Stainless steel

Composition:

- Square showerhead 20 cm or 25 cm
- mixer valve for adjusting the temperature of the overhead shower and a cold water tap for a foot shower

Characteristics:

- Stainless steel employed, type 316 L, is resistant to marine corrosion, hence the risk of rust corrosion is eliminated
- Water supply: can be connected either at the rear of the base or from below to fixed plumbing

Structure: 10 x 5 cm
Weight: 20 kg

With square showerhead
20 cm

With square showerhead
25 cm

Options:

- Duckboard 80 x 80 cm
- Protective cover

Niagara > p.162

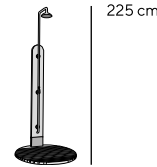

- In solid teak and stainless steel

Composition:

- Round showerhead Ø 17,5 cm
- ¼ turn tap
- Round teak duckboard Ø 90 cm

Characteristics:

- The shower must be connected at the rear of the base

Structure: 20 x 4 cm
Duckboard: 90 cm
Weight: 45 kg

Option:

- Inline mixing valve

Tropic > p.163

- Teak and chrome-plated brass

Composition:

- 1/4 turn tap and a mixer valve
- Handheld showerhead
- Teak duckboard 75 x 85 cm

Characteristics:

- Proposed in two versions with or without mixing valve
- Water supply: can be connected either at the rear of the base (the shower without mixing valve can be connected to a garden hose) or from below to fixed plumbing

Structure: 20 x 8 cm
Duckboard: 75 x 85 cm
Weight: 39 kg

With square showerhead
20 cm

With square showerhead
25 cm

Options:

- Protective cover
- Inline mixing valve

Graphite > p.164

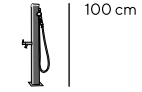

- Galvanized steel

Composition:

- ¼ turn tap for a foot shower
- Handheld showerhead

Characteristics:

- The powder-coated aluminium, with a double surface treatment, confers an effective corrosion-resistant shield, guarantees long-lasting protection and requires very little care
- Water supply: can be connected either at the rear of the base (can be connected to a garden hose) or from below to fixed plumbing

Structure: 10 x 5 cm
Weight: 8 kg

Options:

- Teak duckboard 80 x 80 cm
- Protective cover
- Inline mixing valve

Riva > p.164

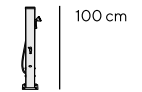

- En acier inoxydable brossé

Composition:

- Handheld showerhead
- ¼ turn tap for a foot shower, cold water

Characteristics:

- Water supply: can be connected either at the rear of the base (can be connected to a garden hose) or from below to fixed plumbing
- The particular stainless steel employed, type 316 L, is resistant to marine corrosion, hence the risk of rust corrosion is eliminated

Structure: 10 x 5 cm
Weight: 8 kg

Riva with thermostatic mixer

Riva without thermostatic mixer

Options:

- Teak duckboard 80 x 80 cm
- Protective cover
- Régulateur d'eau chaude pour la Riva sans mitigeur

California > p.165

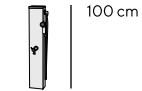

- En teck

Composition:

- ¼ turn tap for a foot shower
- Handheld showerhead

Characteristics:

- Water supply: can be connected either at the rear of the base (can be connected to a garden hose) or from below to fixed plumbing

Structure: 17 x 11 cm
Weight: 8 kg

Options:

- Teak duckboard 75 x 80 cm
- Protective cover
- Inline mixing valve

ACCESSORIES SHOWER & POSTS

Handheld showerhead

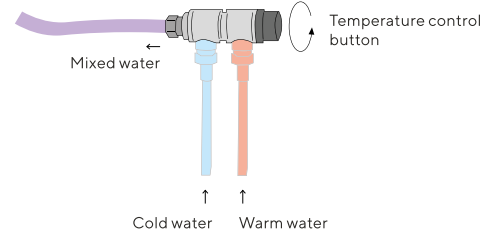

- The showerhead is practical and a joy to use. It is available as an easy-to-attach option for several shower models.
- The mass of water released by the showerhead provides an extremely gentle sensation on contact with the skin.
- The kit contains a shower hose and a showerhead.

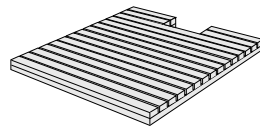

Shower hose length: 1.5 m

Inline mixing valve

- The inline mixing valve serves as a mixing valve for all shower models with a ¼-turn tap that do not have a built-in mixing valve.
- Installation is straightforward: the inline mixing valve is placed upstream of the shower. It has two inlets for the cold water and hot water supplies and one outlet of mixed hot/cold water to the shower.
- The temperature is adjusted via the green temperature control button (28-30°).
- An antiscald feature is integrated, for peace of mind when children use the shower.

Duckboard

Duckboard 80 x 80 cm

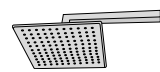

Suitable for shower models:
Quartz, Marina, Squadra, Borne
Graphite, Borne Riva

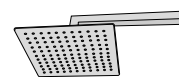

Duckboard 75 x 80 cm

Suitable for shower models:
Eclipse solaire and California post

Square showerhead

Square showerhead
20 x 20 cm

Square showerhead

- Beige Stripes
- Aqua Stripes
- Pervenche Blue Stripes

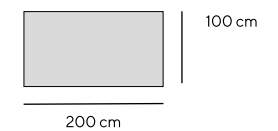

Bath Towels

- 100 % cotton, sand colour

Bath towels 150 cm

Bath towels 200 cm

General terms and conditions of sale

Precedence

Our sales are subject to the present terms and conditions which take precedence over all purchasing terms, unless expressly stipulated otherwise by ourselves.

Reserve of property clause

Goods sold remain the property of Tectona S.A. until payment of the amount invoiced has been received in full. However risks are transferred once the goods leave the seller's stores and warehouses. In this case should payment not be made within the date agreed by both parties, the seller reserves the right to recuperate goods delivered, and if deemed necessary, to cancel the contract.

Price

All taxes, duties, rights or other services requiring payment of whatever nature relating to the agreed sale and in application of French laws, standards and regulations or those applicable in the purchaser's country of importation or in the country(ies) of transit, are to be borne by the purchaser.

Cancellation of orders

No partial or full cancellation of any order passed in one of our sales outlets will be accepted without written agreement on our part.

Delivery lead times. Order processing

Orders are processed within the limit of available stocks. For other countries, deliveries are based on quotation. Delivery lead times are according to a quotation. The purchaser may not invoke delivery delays as a reason to refuse goods unless such lead times are significant. We do not accept responsibility in the case of delays or nondelivery of all or part of orders in the following cases:
a) Should the purchaser fail to respect the payment terms stipulated on our confirmation of order form;
b) Should the information required to process the order fail to reach us in time;
c) Should the delay or non-processing of the order result from, in particular, one of the following: strike, accident, fire, natural catastrophe, civil or national war, riots, impossibility to obtain supplies, delays on the part of our own suppliers and/ or carrier and any other cause outside our control.

Storage

Should the delivery date be put back by the purchaser with sufficient warning to cancel the carrier, the goods are nonetheless considered to have been delivered at the date stipulated on the order confirmation. The invoice is in this case established according to the initial date and the goods are stored at the consignee's expense and risk.

Deliveries

Our goods are delivered duty-paid, free of charge in mainland France, for orders over € 1000. Goods are transported at the risk of the consignee. It is up to the consignee to report any anomalies to the carrier before accepting delivery of goods. Any anomalies must be noted on the delivery note, a copy of which will be kept by the customer who will confirm the said anomalies within 48 hours by registered mail to the carrier having made the delivery. The purchaser must indicate if deliveries are not on ground-floor level or will require special handling on passing the order. In this case, Tectona will have an estimate drawn up and submitted to the purchaser and any added expenses will be invoiced by Tectona to the purchaser.

Payment

a) Our prices are considered for payment on delivery of goods unless stipulated otherwise;
b) Invoices are to be paid to our headquarters, irrespective of the terms indicated on the order forms submitted to us;
c) Orders must be paid in full at the time of passing orders.
d) Should a single payment not be made by a due date, all sums remaining due by the purchaser become due immediately and legitimately.
e) It is expressly noted that any malfunction or repairs required of goods supplied will under no circumstances constitute a motif for non payment or for delayed payment of sums due by the purchaser;
f) Payment is considered to be: not the submittal of a bill of exchange or a cheque entailing the requirement to pay, but the effective cashing by Tectona of the sum due at the agreed date.

Non payment

In the case of overdue payment or non payment, Tectona may suspend all orders in hand. In addition and in application of Article 441-6 of French Commercial Law, any amount not

paid at the agreed date legitimately gives rise, and without any forewarning, to payment of overdue interest at the valid legal interest rate at the day of invoicing plus four points. Interest will be charged from the day of the agreed payment date until full payment is made to Tectona (interest and costs in principle).

Warranty

Our products are guaranteed for 2 years for normal outdoor use. The warranty does not cover damage due to improper use.

Insolvency. Bankruptcy

Should the purchaser at any time either before or after the delivery of all goods not fully paid for, be declared insolvent, be the object of any request or procedure for bankruptcy or compulsory liquidation, the sale would immediately and legitimately be cancelled as soon as any one of the above should occur, unless we should notify the purchaser of our decision to maintain the sale.

Complaints

Any complaint of whatever nature should be notified in writing and in detail, (registered mail) as soon as possible following reception of the goods, to the following address: 36 rue du Bac, Paris 75007 France.

Dimensions

Tectona reserves the right to make changes at any time as deemed necessary to its products (in particular to the dimension of furnishings), without obligation to modify goods supplied previously or orders in hand. Tectona reserves the right to modify without prior notice the models defined in its brochures and catalogues. Such modifications do not incur the responsibility of Tectona and will, if appropriate, be notified to the customer at the time of ordering.

Returned goods

No goods for which the order was registered in one of our points of sale may be returned to us without our prior consent and our returning instructions. All goods returned must be made in original packaging. All goods returned in good condition and accepted by us will be credited or reimbursed at 90% of the invoiced value. In the case of goods purchased by mail order by a non professional or consumer, the latter (purchaser) is entitled to return goods within 14 days of the date of delivery, goods must imperatively be returned in the original packaging. The cost of returning goods is to be borne by the purchaser, with the exception of goods which are not conform with the original order or which are faulty or which have been the object of specific reserves made to the carrier within 48 hours.

Validity of offers and prices

Catalogue offers and prices are guaranteed from March 1st of the current year until the last day of February of the following year. Goods are available for sale until stocks run out. In the case of orders for unavailable goods, the customer will be informed of any unavailability as soon as possible.

Data and freedom

According to French Law 78-17 of January 6 1978 on "Data and Freedom", you have the right to access, rectify and suppress any personal data relating to yourself, by making a request to our company headquarters. Our company is the sole recipient of any information you may communicate to us.

Applicable law. Competent jurisdiction

French law is the sole applicable law. Any litigation must be lodged with the PARIS TRADE TRIBUNALE even in the case of plural defendants or appeals by third parties if the purchaser is a dealer. In other cases, jurisdiction will be determined in accordance with the regulations of the new Code of Civil Procedures.

Precedence

Our sales are subject to the present terms and conditions which take precedence over all purchasing terms, unless expressly stipulated otherwise by ourselves.
